**Background to the ICAV****Description**

KBI Funds ICAV is an open-ended umbrella type Irish Collective Asset-management Vehicle (“ICAV”) with limited liability and segregated liability between Funds. The ICAV was established on 24 August 2016 having converted from company status by way of continuation in accordance with applicable law and the Central Bank requirements.

The ICAV was previously incorporated in Ireland on 9 June 2004 as a public limited company before the conversion into an Irish Collective Asset-management Vehicle and complied with the provisions in the Companies Act 2014 up until its conversion date. The ICAV is authorised by the Central Bank of Ireland (the “Central Bank”) pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, (S.I. 352 of 2011) (as amended) (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”) and the Irish Collective Asset-Management Act 2015 (the “ICAV Act”).

The ICAV is structured as an umbrella Fund consisting of different Funds comprising one or more Classes. The Shares of each Class of a Fund will rank pari passu with each other in all respects provided that they may differ as to certain matters including currency of denomination, hedging strategies, if any, applied to the currency of a particular Class or against interest rate risk applying to a particular Class, dividend policy, the level of fees and expenses to be charged, subscription or redemption procedures or the Minimum Subscription and Minimum Holding applicable.

The assets of each Fund will be separate from one another and will be invested separately in accordance with the investment objective and policies of each Fund. A separate portfolio of assets is not maintained for each Class.

Overdrawn positions that exist in the Funds of the ICAV are as a result of transaction related activity and are not a result of a leverage strategy. While leverage is allowed as per the Prospectus, the longstanding policy of the Investment Manager is not to employ a leverage strategy on any of the Funds.

Effective 13 February 2020, as approved by the Central Bank, the name changed from KBI Institutional Fund ICAV to KBI Funds ICAV.

At the year end, there are fourteen Funds in existence:

	<b>Launch Date</b>	<b>Base Currency</b>
KBI Energy Solutions Fund	10 April 2008	EUR
KBI Water Fund	10 April 2008	USD
KBI Emerging Markets Equity Fund	30 July 2010	EUR
KBI Developed Equity Fund	8 December 2010	EUR
KBI Global Resource Solutions Fund	3 July 2009	EUR
KBI Global Equity Fund	14 March 2011	EUR
KBI 50/50 Global/Eurozone Equity Fund	23 March 2011	EUR
KBI Eurozone Equity Fund	21 March 2011	EUR
KBI North America Equity Fund	23 October 2013	USD
KBI ACWI Equity Fund	17 April 2015	EUR
KBI Integris Global Equity Fund	30 November 2016	EUR
KBI Global Sustainable Infrastructure Fund	27 September 2017	EUR
KBI Diversified Growth Fund	26 November 2019	EUR
KBI Eco Water Fund (ICAV)*	23 October 2019	JPY

\*This annual report and audited financial statements are for all sub-funds of the ICAV excluding the KBI Eco Water Fund (ICAV) whose financial statements are prepared as a standalone basis for the financial reporting period ending 28 February. All primary statements and related notes are for the 13 sub-funds listed only. The financial statement of the KBI Eco Water Fund (ICAV) are available from the administrator on request.

**Background to the ICAV (Continued)**

Effective 13 February 2020, as approved by the Central Bank, the names of the funds changed as follows:

KBI Institutional Energy Solutions Fund changed to KBI Energy Solutions Fund.  
KBI Institutional Water Fund changed to KBI Water Fund.  
KBI Institutional Emerging Markets Equity Fund changed to KBI Emerging Markets Equity Fund.  
KBI Institutional Developed Equity Fund changed to KBI Developed Equity Fund.  
KBI Institutional GRS Fund changed to KBI Global Resource Solutions Fund.  
KBI Institutional Global Equity Fund changed to KBI Global Equity Fund.  
KBI Institutional 50/50 Global/Eurozone Equity Fund changed to KBI 50/50 Global/Eurozone Equity Fund.  
KBI Institutional Eurozone Equity Fund changed to KBI Eurozone Equity Fund.  
KBI Institutional North America Equity Fund changed to KBI North America Equity Fund.  
KBI Institutional ACWI Equity Fund changed to KBI ACWI Equity Fund.  
KBI Institutional Global Sustainable Infrastructure Fund changed to KBI Global Sustainable Infrastructure Fund.

**Investment Objective and Policy*****KBI Energy Solutions Fund***

The Fund aims to achieve the highest possible return for its shareholders by investing primarily in shares of international companies involved in the alternative energy sector.

The Fund will invest primarily in shares of companies trading on the recognised stock exchanges worldwide that operate in the alternative energy sector on a sustainable basis. The Fund will not invest more than 30% of net assets in emerging markets.

The Fund is considered to be actively managed in reference to the Wilderhill New Energy Global Innovation Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

***KBI Water Fund***

The aim of the Fund is to generate the highest possible return for its shareholders by investing primarily in shares of international companies involved in the water sector.

The Fund will invest primarily in the shares of companies that are listed on recognised stock exchanges worldwide and who operate on a sustainable basis in the water industry. The Fund will not invest more than 30% of net assets in emerging markets.

The Fund is considered to be actively managed in reference to the MSCI ACWI Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

***KBI Emerging Markets Equity Fund***

The aim of the Fund is to achieve long-term growth by investing in shares of companies in global emerging markets that pay out a higher than average dividend. The Fund is measured against the MSCI Emerging Markets Index.

The Fund will invest primarily in shares of companies listed or trading on stock exchanges of emerging market countries and that pay out above average dividends.

The Fund is considered to be actively managed in reference to the MSCI Emerging Markets Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

**Background to the ICAV (Continued)****Investment Objective and Policy (Continued)*****KBI Developed Equity Fund***

The aim of the Fund is to achieve long-term capital growth by investing in the shares of companies with an above average dividend pay-out. The Fund is measured against the MSCI World Index.

The Fund will invest primarily in shares of companies listed or trading on the major worldwide stock exchanges and that pay out above average dividends.

The Fund is considered to be actively managed in reference to the MSCI World Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

***KBI Global Resource Solutions Fund***

The aim of the Fund is to generate the highest possible return for its shareholders by investing in shares of international companies involved in environmental sectors.

The Fund will invest primarily in the shares of companies that are listed on recognised stock exchanges worldwide and that operate in environmental sectors such as, but not limited to, water, agriculture, renewable energy, energy efficiency and water management.

The Fund is considered to be actively managed in reference to the S&P Global Natural Resources Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

***KBI Global Equity Fund***

The aim of the Fund is to achieve long-term capital growth by investing in the shares of companies with an above average dividend pay-out. The Fund is measured against the MSCI World Index.

The Fund will invest primarily in shares of companies listed or trading on the major worldwide stock exchanges and that pay out above average dividends. The Fund may invest up to 20% of its Net Asset Value in the KBI Emerging Markets Equity Fund. There will be no Investment Manager fees charged on this investment.

The Fund is considered to be actively managed in reference to the MSCI World Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

***KBI 50/50 Global/Eurozone Equity Fund***

The aim of the Fund is to achieve long-term growth by investing in the shares of companies that pay out a higher than average dividend.

The Fund will invest primarily in shares of companies trading on the major world stock exchanges and that pay out above average dividends.

Fifty percent (50%) of the assets of the Fund are considered to be actively managed in reference to the MSCI EMU Index and fifty percent (50%) of the assets of the Fund are considered to be actively managed in reference to the MSCI World ex Eurozone Index by virtue of the fact that the relevant portion of the assets of the Fund seeks to outperform the relevant Index and uses the relevant Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the relevant Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the relevant Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the relevant Index which may be limited. This is likely to influence the extent to which the Fund can outperform the relevant Index.

**Background to the ICAV (Continued)****Investment Objective and Policy (Continued)*****KBI Eurozone Equity Fund***

The aim of the Fund is to achieve long-term growth by investing in the shares of companies in the Eurozone area that pay out a higher than average dividend. The Fund is measured against the MSCI EMU Index.

The Fund will invest primarily in shares of companies trading on stock exchanges of the Eurozone area and that pay out above average dividends.

The Fund is considered to be actively managed in reference to the MSCI EMU Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

***KBI North America Equity Fund***

The aim of the Fund is to achieve long-term capital growth by investing in the shares of companies which offer a high dividend pay-out.

The Fund will invest primarily in shares of North American (U.S. and Canada) companies listed or trading on recognised exchanges worldwide.

The Fund is considered to be actively managed in reference to the MSCI North America Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

***KBI ACWI Equity Fund***

The aim of the Fund is to achieve the highest possible return by investing in the shares of companies that are part of the MSCI ACWI Index and that in the opinion of the Investment Manager offer a high dividend yield. The Fund is measured against the MSCI ACWI Index.

The Fund will invest primarily in shares of companies listed or trading on the major worldwide stock exchanges and that pay out above average dividends. The Fund may invest up to 20% of its Net Asset Value in the KBI Emerging Markets Equity Fund. There will be no Investment Manager fees charged on this investment.

The Fund is considered to be actively managed in reference to the MSCI ACWI Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

***KBI Integris Global Equity Fund***

The aim of the Fund is to achieve long-term capital growth by investing in the shares of higher dividend paying companies in their regional industry group. The Fund is measured against the MSCI World Index.

The Fund will invest primarily in shares of companies listed or trading on the major worldwide stock exchanges. The Investment Manager integrates environmental, social and governance ("ESG") factors into its investment process and excludes holdings deemed inconsistent with its Responsible Investment guidelines. The ESG screening process is designed to exclude investment in certain controversial sectors as determined by the Investment Manager's Responsible Investment Committee. The Investment Manager's target is that the Fund's ESG score is higher than the benchmark.

**Background to the ICAV (Continued)****Investment Objective and Policy (Continued)*****KBI Integris Global Equity Fund (continued)***

The Fund is considered to be actively managed in reference to the MSCI World Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

***KBI Global Sustainable Infrastructure Fund***

The aim of the Fund is to generate the highest possible return for its shareholders and outperform the S&P Global Infrastructure Index by investing primarily in shares of listed companies operating in infrastructure related sectors.

The Fund will invest primarily in shares of companies listed or traded on the major worldwide stock exchanges which generate a substantial portion of their turnover from the provision of sustainable infrastructure facilities and services. Such companies are primarily involved in the supply or treatment of water, waste water and energy, or in the provision, maintenance or enhancement of energy infrastructure, water infrastructure or infrastructure designed to support the production and efficient distribution of food and crops.

The Fund is considered to be actively managed in reference to the S&P Global Infrastructure Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

***KBI Diversified Growth Fund***

The aim of the Fund is to provide steady long term capital growth.

The Fund is structured as a Fund of Funds and will invest in a combination of collective investment schemes, which are designed to provide exposure to various asset classes such as global equities and equity-related securities, global debt and debt-related securities, currencies and commodities.

The Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.

**Net Asset Value**

The Net Asset Value of each Fund or, if there are different Classes within a Fund, each Class will be calculated by the Administrator as at the Valuation Point on or with respect to each Dealing Day in accordance with the instrument. The Net Asset Value of a Fund shall be determined as at the Valuation Point for the relevant Dealing Day by valuing the assets of the relevant Fund (including income accrued but not collected) and deducting the liabilities of the relevant Fund (including a provision for duties and charges, accrued expenses and fees and other liabilities). The Net Asset Value of a Fund will be expressed in the Base Currency of the Fund, or in such other currency as the Directors may determine either generally or in relation to a particular Class or in a specific case.

Dealing Day means every Business Day or such other day or days as may be determined by the Directors and notified in advance to Shareholders provided that there shall be at least two Dealing Days in each month.

For KBI Energy Solutions Fund, KBI Water Fund, KBI Global Resource Solutions Fund, KBI Emerging Markets Equity Fund, KBI Developed Equity Fund, KBI Global Equity Fund, KBI Eurozone Equity Fund, KBI 50/50 Global/Eurozone Equity Fund, KBI North America Equity Fund, KBI ACWI Equity Fund, KBI Integris Global Equity Fund, KBI Global Sustainable Infrastructure Fund, and KBI Diversified Growth Fund, Business Day means every day, other than a Saturday or Sunday, which are bank business days in Ireland and in such other market or markets to which the Fund has, in the reasonable opinion of the Investment Manager, a substantial exposure or such other day or days as the Directors may determine and notify in advance to Shareholders.

## Investment Manager's Report

### KBI Energy Solutions Fund

The KBI Energy Solutions Fund generated a positive return of +27.2% during the 12 months period to end August 2020, underperforming the Wilderhill New Energy Global Innovation Index which appreciated by +61.9% while the MSCI AC World Index increased by +7.3% (all in EUR terms). The Fund appreciated by 14.0% during the 12 months period to end August 2019, while the MSCI AC World Net Return Index gained by 5.4% (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

It was a very volatile period for equity markets, with a very sharp sell-off caused by the emergence of the global pandemic in March. However, equity markets bounced back considerably as economies began to open up again. The strategy recorded a very strong absolute return and strong relative performance versus the MSCI AC World Index due to the resilience of the clean energy sector. The strategy did underperform its theme benchmark mostly due to its higher exposure to the more defensive utilities and being underweight growth/momentum sectors such as hydrogen and fuel cells which were very much in favour as a style.

On a segment level, the largest positive contribution to performance came from the renewable energy segment. The strength in the Renewable Energy segment was across both wind and solar companies. During the economic downturn which followed the Covid-19 epidemic, the sector proved its resilience with the largest wind turbine manufacturer Vestas able to reinstate its original pre-Covid-19 guidance. Vestas was the top contributor overall as the company reported strong earnings driven by record order books as the demand for wind energy increased. The renewable fuels and wind sectors benefited from an extension of tax credits supporting their respective industries for an extended period were announced in the US in December. The clean energy sector rallied further as it was central to numerous stimulus packages, the more the significant being the European Union (EU). The EU unveiled a €750 billion recovery package for the coronavirus pandemic with the transition to green energy and climate change at the heart of it. Furthermore, the US presidential candidate Biden revealed he would spend \$4trillion on clean energy which boosted US focused wind and solar companies. Over the course of the year, the strategy increased its exposure to US solar residential installers by adding to Sunrun and Sunnova. They both rallied significantly in the year with Sunrun up 239.4% helped by its acquisition of another solar installer Vivint (not held). The strategy also benefited from M&A (mergers and acquisitions) activity with its holding in the Chinese wind farm operator Huaneng Renewables, which was privatised at a significant premium to its prior trading range.

The utilities segment was the next largest positive contributor to performance in the period. In the volatile environment the utilities segment held up the best led by the clean energy utilities with secure long-term supply contracts and no exposure to merchant power prices. The European clean energy utilities rallied the most benefitting from the EU's increased focus on decarbonisation and green energy.

The Energy Efficiency segment had the smallest contribution to performance but did outperform the broader market return. The Energy Efficiency segment sold off the most during the market downturn, led by companies exposed to potential short-term demand shocks such as auto and consumer related stocks. The strategy reduced its exposure to some end markets due to concerns about end demand weakness in areas such as non-residential construction and auto. However, we remained more constructive on the residential housing sector and increased exposure to the electric vehicle value chain. As markets bounced back, technology stocks rallied the most, especially those with exposure to structural growth trends such as semiconductors, electric vehicles growth and energy storage. Within the Energy efficiency segment stocks such as ASML (next generation semiconductor equipment), Alfen (Electric Vehicle (EV) Charging infrastructure) and Varta (micro-batteries) led the gainers while the more cyclical, value plays underperformed. This mirrored the activity in the overall market with momentum continuing to be in favour.

### Investment Outlook

We remain constructive on the prospects of the Renewable Energy segment. The global pandemic has caused minimal disruptions, proving the resilience and the maturity of the industry. This has been confirmed by the resilience of companies' earnings as reported recently. We favour the high quality, cash rich, technology leaders who can withstand near-term volatility. These include companies such as Vestas, the largest wind turbine manufacturer globally as well as the US solar utility scale developer First Solar. These and other pure play renewable companies can expect further rerating depending on the result of the US election. The outlook has been strengthened by the various post-Covid-19 stimulus packages announced by various governments and the EU which has put the transition to clean energy as a central theme.

**Investment Manager's Report (Continued)****KBI Energy Solutions Fund (continued)****Investment Outlook (Continued)**

The Energy efficiency segment is the most exposed to cyclical end markets which can bounce back the most as economies recover. This segment also offers exposure to several secular growth trends including building technologies, smart grid infrastructure, auto electrification, and disruptive technology such as energy storage, which can also benefit from clean energy specific stimulus packages. Our utilities and renewable energy infrastructure holdings remain a core defensive pillar of the strategy. We are encouraged by the resilience of these business models due to the majority of their cashflows being supported by long-term fixed power purchase agreements.

**KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI Water Fund**

The KBI Water Fund increased by 12.1% for the 12 months to end August 2020, underperforming the MSCI ACWI Index, which increased by 16.5% (in USD terms). The Fund decreased by 6.4% for the 12 months to end August 2019, underperforming the MSCI ACWI Index, which decreased by 0.3% (in USD terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

The twelve-month period under review was one of the most volatile on record for global equities. Late in 2019 and early in 2020, many leading economic indicators were trending positively, particularly those related to some industrial and construction end markets, which are closely tied to the KBI Water Fund. The commentary from companies held in the KBI Water Fund at the time reinforced our conviction that earnings growth in 2020 would be strong. The macroeconomic situation changed drastically with the onset of the Covid-19 pandemic, first in Asia but more so as the virus spread to Europe and beyond, which resulted in a steep sell-off in global equities in late February and much of March. There was a high degree of economic uncertainty at the time and the recovery since then has been varied by geography and by economic sector. However, global equity markets have rebounded strongly and are close to all time-highs as Central Banks have injected huge amounts of liquidity to ease the economic impacts of the pandemic. Earnings in the portfolio during 2020 have been very resilient, particularly when compared to the broader market. However, the uncertainty that prevails has resulted in significant style dynamics in markets which have been a headwind to the KBI Water Fund and have been the primary driver of the underperformance in the period under review. Up to the end of August, growth stocks have outperformed value stocks by 34% in 2020, while emerging markets and small cap stocks have also underperformed with all of these factors a headwind to the portfolio.

Somewhat surprisingly amid all the economic uncertainty, the more defensive Water Utility segment of the portfolio was the weakest performer in the period under review. This was primarily driven by meaningful exposure to emerging market utilities which were weak despite the resilient nature of their business models. The Water Infrastructure and Water Technology segments of the portfolio contributed similarly to the positive return in the period, with the Water Technology segment performing the better of the two. The Water Technology segment has exposure to many companies with business models focused on recurring revenues streams that perform relatively consistently through an economic cycle. The earnings of these companies have been very resilient in 2020 and this was the primary driver of the strong performance of the segment. The Water Infrastructure segments positive performance was aided most by the strong rebound in US housing end markets. The stay at home orders and low interest rates in the US resulted in consumers spending more discretionary income on their homes rather than on other discretionary items such as travel and eating out.

The top three contributors to the fund were Fortune Brands, Kurita Water Industries and Danaher. Fortune Brands is a leading supplier of home and security products including plumbing equipment, kitchen and bathroom cabinets and doors and security products. A high proportion of company sales are generated from repair and remodel type activities. The stock was a strong performer in the period as strong execution and robust end markets continue to result in consistent earnings growth. Kurita Water is a leader in the provision of water treatment solutions and chemicals for industrial customers, with a particular focus on ultra-pure water for the electronics industry. The stock was a strong performer in the period as results were more resilient than the market expected, and investors are increasing in confidence that management will deliver margin expansion over the medium term. Danaher is a high-quality company with market leading water technologies in both the test and measurement and water treatment space in addition to other exposures to diverse healthcare and industrial end markets. The company has a high proportion of recurring revenues and has a strong track record of growing earnings through the economic cycle. These attributes continue to be in favor with the market.

The top three detractors from the fund were Metro Pacific Investments, Beijing Enterprises Water Group and Costain Group. Metro Pacific Investments is an infrastructure holdings company based in the Philippines, providing water and sanitation services, with other operations in power, toll roads and hospitals. The stock was weak in the period primarily as a result of a drought in its core water regions which significantly impacted operations and has forced a renegotiation of its largest concession contract. Beijing Enterprises Water Group is a large Chinese water utility listed on the Hong Kong stock exchange. The company is focused primarily on wastewater treatment but also has operations in water supply and environmental remediation. The stock was weak in the period as emerging market stocks remained out of favor, particularly Hong Kong listed stocks due to the political tensions in the region. Operations at the company have been largely in line with expectations during the pandemic. Costain Group is a UK consulting engineer and infrastructure solutions company. The stock was weak in the period after problems with two legacy contracts resulted in meaningful costs to the company and a capital raise was required earlier this year in a weak market environment.

**Investment Manager's Report (Continued)****KBI Water Fund (continued)****Investment Outlook**

We are seeing early signs of upturns from the bottom in several very relevant end markets for the KBI Water Fund such as US residential construction. In fact, the strategy had a stronger than expected earnings season overall in July and August and we remain confident in the relative earnings performance of the portfolio for the remainder of 2020 and into 2021. We have also taken advantage of the extreme volatility to add some new stocks to the portfolio, broadening the breadth of our exposures, upgrading the quality and improving on the upside-asymmetry. More recently we have been taking profits in stocks where the bounce back has been so strong that the relative risk reward is now less attractive. While we have seen volatility in valuations, we anticipate minimal intrinsic value destruction for our companies as they emerge on the other side of this event. We continue to have conviction around companies with strong order backlogs serving infrastructure end markets and manufacturers of various essential water equipment. The balance sheets of our companies are strong, with about 50% of the portfolio under-levered or with net cash. Finally, valuation remains compelling with the recent market dynamics and the strong earnings delivery of our companies creating a more favorable relative valuation compared to the broader market than any time in the history of the strategy.

**KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI Emerging Markets Equity Fund**

The KBI Emerging Markets Equity Fund registered a rise of 0.4% during the 12 months to end August 2020, underperforming the MSCI Emerging Markets Index which increased by 5.4% (in EUR terms). The Fund registered a rise of 0.1% during the 12 months to end August 2019 against a return of 1.0% in the MSCI Emerging Markets Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced three distinct phases:

- 1) In the period prior to the global spread of the Covid-19 pandemic, the exceptional rally in global stocks continued. The balance of macro and corporate data was positive and the fear that policy may be impotent in the face of overwhelmingly negative structural forces had lessened appreciably. Against that backdrop, the early months of the year saw global stock markets set new all-time highs.
- 2) This positive period came to a shuddering halt in early March. The feared economic impact of the Covid-19 pandemic dominated all, and global stock markets suffered the fastest bear market on record.
- 3) However, from the low point on 23rd March, global stock markets have rebounded sharply. The aggressive policy responses, the slowdown of the virus spread, and the first steps towards the lifting of lockdowns, combined to ease the extreme level of investor fear and fuel a remarkable rally to fresh all-time highs.

It was an extremely challenging period from a style point of view as growth outperformed value by 29.9% and was particularly strong in Asia. High yield had a very difficult time underperforming by 18.1% predominantly due to poor performance in Asia although it did manage to outperform in Latin America. Large cap stocks were the relative winners while mid cap stocks struggled.

Stock selection detracted from performance in retailing and in media and entertainment. In retailing, Home Product Centre declined as management tone was quite downbeat on the worsening spending outlook from job/income losses and the ending of the pandemic stimulus package. Megahome/HMPRO stores in the north and north-eastern region of Thailand saw some windfall gains from the recent flooding but overall reduced income power is holding back sales. The stock is still a bellwether within the sector given its solid track record of returns on capital, sustained market leadership and top-quality management. We have no exposure to Alibaba which was sharply higher over the period. The Q2 growth rate of combined customer management revenue and commission revenue of China retail marketplace was back to the December 2019 level, the negative impact from COVID-19 is now largely behind it. Investors are hoping that the Southbound Stock Connect can drive a re-rating of the stock while Ant's IPO should improve the Sum of the Parts valuation of the stock. In media and entertainment, Zee Entertainment declined as 2020 will be another tough year for media companies with Covid-19 leading to pressure on advertising revenues and to multiplex closures. Advertising revenues tend to be one of the worst impacted areas when the economy goes through a downturn. The stock was also hit by news that the Ministry of Corporate Affairs was to carry out an investigation into the company, Zee Entertainment has co-operated with the investigation and has taken multiple steps to address investor concerns including board reconstitution, increased disclosure on Zee5 and on the balance sheet and new policies on treasury management, investments and related party transactions being disclosed publicly.

Stock selection contributed positively to performance in real estate, pharmaceuticals and in capital goods. In real estate, Logan Property rose sharply as the company achieved sales of Rmb37.3bn (+13% year on year) in the first 5 months of 2020 and saw strong momentum continue in June. Management believes that it is on track to fulfil the Rmb110bn target and is confident on delivering 20% sales/earnings growth over the next 3 years. Logan Property is committed to maintain a dividend payout ratio of 40% while it expects to benefit from its focused strategy (mainly Shenzhen and the Greater Bay area) and its edge on urban renewals. In pharmaceuticals, Chongqing Zhifei Biological Products rallied strongly after China approved a coronavirus vaccine developed by Chongqing to begin human testing. The vaccine is one of eight treatments which are being tested on humans. The vaccine was co-developed with The Institute of Microbiology of the Chinese Academy of Sciences. In capital goods, Sinotruk registered a strong rise during the period under review. The Heavy-Duty Truck (HDT) sector continues to do well due to the accelerated phase out of NS3 (NS - network simulator) replacement purchase subsidies. The continued strict enforcement of truck weight limits will force operators to replace lighter trucks with HDT. The government is also expected to introduce supportive measures to shore up fixed asset investment in order to stabilise GDP (gross domestic product) which should translate into strong demand for construction trucks. NS6 nationwide implementation is going ahead in July 2021 and frontloading in H1 (first half year) will lead to solid sales.

**Investment Manager's Report (Continued)****KBI Emerging Markets Equity Fund (continued)****Investment Outlook**

In the face of the pandemic, policymakers across the region have responded with a range of fiscal and monetary measures to offset the growth shock. Initial indications out of China have been promising as activity has been returning to normal, if other countries behave in a similar fashion the economic impact may be significant but short-lived.

On the positive side, emerging market companies have been focusing on profits as the cycle matured, capex to sales is at the lowest level since 1995 and the corporate sector was already aware that nominal GDP growth would be lower. Total dividends were higher than ever, and emerging markets represent the least leveraged part of the global investment universe.

Given the exceptional circumstances, our focus has changed to prioritising balance sheet analysis. All investment managers regardless of style now face the same problem – all “flow” related metrics – based on earnings, sales and cashflow are essentially redundant for most companies during this period. Similarly, we expect dividends will also be reduced or suspended, to varying degrees, with certain regions and industries being under more pressure than others.

**KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI Developed Equity Fund**

The KBI Developed Equity Fund registered a decline of 1.3% during the 12 months to end August 2020, underperforming the MSCI World Index, which increased by 7.5% (in EUR terms). The Fund registered a decline of 2.9% during the 12 months to end August 2019 against a rise of 5.9% in the MSCI World Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced three distinct phases:

- 1) In the period prior to the global spread of the pandemic, the exceptional rally in global stocks continued. The balance of macro and corporate data was positive and the fear that policy may be impotent in the face of overwhelmingly negative structural forces had lessened appreciably. Against that backdrop, the early months of the year saw global stock markets set new all-time highs.
- 2) This positive period came to a shuddering halt in early March. The feared economic impact of the COVID-9 pandemic dominated all, and global stock markets suffered the fastest bear market on record.
- 3) However, from the low point on 23rd March, global stock markets have rebounded sharply. The aggressive policy responses, the slowdown of the virus spread, and the first steps towards the lifting of lockdowns, combined to ease the extreme level of investor fear and fuel a remarkable rally to fresh all-time highs.

It was a particularly difficult period from a style perspective as growth outperformed value by 34.3%, although a feature across all regions, growth was particularly strong in North America and Europe. High yield also struggled, underperforming by 13.8% as investors showed little interest in equity income even as interest rates continued to decline. Also, of note, small cap stocks performed poorly relative to their larger cap counterparts.

Stock selection was disappointing in technology hardware, media and entertainment and in real estate. In technology hardware, the underweight position in Apple detracted from performance as it more than doubled during the period under review. Investors are willing to pay a services like premium for the entire earnings stream. While expectations for revenues are not elevated, investors expect a strong flow through of even modest revenue upside to earnings given the largely fixed cost nature of costs in the short-term. Strong inflows from retail investors suggest that momentum is playing a significant role in the recent share price surge. In media and entertainment, Omnicom and Interpublic struggled as the lack of guidance and poor visibility weighed on the stock prices while we have no exposure to Facebook which recorded a rise of over 45%. Secular growth stocks remained in demand as investors were willing to pay a significant premium for growth given the perceived scarcity of growth while lower for longer interest rates meant that the long duration nature of their earnings was also rewarded. In real estate, Simon Property Group fell sharply in response to the COVID-19 pandemic. The likelihood that many of its retail clients would have difficulty maintaining their rental payments, coupled with uncertainty about how its creditors might respond, cast great uncertainty over the outlook. The stock price rebounded somewhat as the extraordinary level of uncertainty eased, and the first steps towards the lifting of lockdowns materialised.

Relative stock selection contributed positively to performance in capital goods and pharmaceuticals. In capital goods, Cummins was up sharply as investors believe that 2020 will be the trough year for the North American truck market with strong growth expected over the coming years in advance of the regulatory/emissions changes in 2024. Cummins has a unique exposure to multiple markets that are showing the best signs and potential of sustained recovery and margins are also being helped by the aggressive cost reduction programme. In pharmaceuticals, AbbVie rallied on the back of a robust outlook with several long-term drivers including Skyrizi, Rinvoq, Imbruvica, Vraylar and aesthetics. Management remain on track for \$2bn in cost synergies by 2022, positioning the company for further operating margin expansion. AbbVie plans to pay down \$15-18bn in debt by the end of 2021 leaving ample balance sheet capacity for additional business development, dividends and share buybacks.

**Investment Outlook**

Stock markets often surprise, but the rebound of recent months has shocked many. Given the scale of economic and earnings contraction, it seemed especially strange. But in the wake of the Lehman collapse in September 2008, the global economy and banking system also faced meltdown. Many feared a re-run of the great depression. This view failed to reckon with the powerful tools available to policymakers. Crucially, the policy responses to the pandemic have seen these tools deployed with renewed and expanded aggression.

For example, negative official interest rates are the new normal in Europe and bond investors at every maturity out to 30 years are all but paying for the privilege of loaning money to many Eurozone governments. More generally, negative real long-term interest rates are now embedded globally.

**Investment Manager's Report (Continued)****KBI Developed Equity Fund (continued)****Investment Outlook (Continued)**

Notwithstanding how economies behave in the months ahead, in the years ahead, the likelihood that many stocks will generate positive cash flows is high. In contrast to their bond brethren, long-term stock investors will likely be well compensated for risking their capital. Historically low discount rates matter. While predicting the direction of the stock market is notoriously challenging, the return of investor optimism may prove more durable than many currently fear.

**KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI Global Resource Solutions Fund**

The KBI Global Resource Solutions Fund gained 10.3% in the year to end August 2020, outperforming the S&P Global Natural Resources Index which fell 10.3%. The Fund also outperformed the MSCI AC World Index, which appreciated by 7.3% in the period (all in EUR terms). The Fund gained 3.5% in the year to end August 2019, outperforming the S&P Global Natural Resources Index which fell 6.0%, but underperforming the MSCI AC World Index, which appreciated by 5.4% (all in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Overall, it was a period of high volatility for equity markets. The period to end 2019 delivered strong equity market returns. The gains made by equity markets stemmed from a variety of factors, including particularly the apparent partial resolution of the US/China trade dispute, and reasonably solid economic activity data. Easing of monetary policy in both the US and eurozone in the second half of the year also helped sentiment, as did the reduction of uncertainty surrounding Brexit following the UK's parliamentary elections.

The 'risk on' bias within broader market returns was reflected across the Water Infrastructure, Renewable Energy and Energy Efficiency segments. Typically, more defensive Utilities also performed strongly. This largely reflected strong performance of UK utilities after the general election which largely put to rest market fears over the potential nationalisation of utilities had the Labour party gained power. Agri Inputs was weak reflecting continued weakness in fertiliser prices.

Q1 2020 was dominated by the impact of Covid-19, which had a very significant negative impact on society, on economic activity and on financial markets. Initially, the main impact was seen in China, the epicentre of the pandemic, but later in the period the virus spread rapidly worldwide. Governments reacted rapidly, ramping up spending on healthcare but also took various measures to support the income of workers losing their jobs and reducing various taxes, particularly those relevant to businesses in a bid to help cashflow. Central banks cut interest rates, injected liquidity and changed bank regulatory rules or standards to make it significantly easier for banks to increase lending. In general, the attitude of policymakers was to "do what it takes" to support economic activity and boost healthcare systems, almost regardless of the increase in deficits and debt that will result.

Performance for the remainder of the period has been very strong. Q2 2020 (and the subsequent period to end August) was one of the strongest quarters on record for equity markets, resulting in a sharp recovery in the value of investors' portfolios despite economic activity experiencing one of the worst quarters in history. Corporate earnings saw record declines as Covid-19 and the economic lock-down impacted businesses. Perceived secular growth was again the winner, with strong outperformance coming from Technology as momentum in a small number of mega-cap names continued whilst value & income, underperformed in developed and emerging markets. The key catalyst for the positive market sentiment was the "shock and awe" response of global authorities to the pandemic (both in terms of speed and size of stimulus). The combination of central bank liquidity and government fiscal stimulus was immediate and enormous.

Within the GRS (global resource solutions) strategy, the rebound in broader market returns was most notably reflected across the more cyclical segments of Energy Efficiency and Water Infrastructure. Renewable Energy was also a top performing segment thanks to the announcement of several stimulus packages, most notably across Europe and the US. Agribusiness initially lagged among the three resources (but still providing double digit absolute returns), reflecting the links between energy prices and grains, fertilisers and crop chemical prices, as well as continued uncertainties over US-China trade. However, more recently Agribusiness performance has been strong reflecting an improvement in fertilizer prices and the resultant strong results from fertiliser companies which were further buoyed by cost reduction plans.

**Investment Outlook**

The Fund invests in the key resources of water, food and energy. These resources are critical to how we live and there are no substitutes. The Fund invests in companies that provide solutions to the problem of growing supply-demand imbalances across these scarce and essential resources, which are driven by a combination of significant demographic changes and significant supply constraints. We believe this is an attractive source of growth that underpins the investment thesis for the Fund.

**Investment Manager's Report (Continued)****KBI Global Resource Solutions Fund (continued)****Investment Outlook (Continued)**

**Regulation and government policies** increasingly support the drivers underlying the Fund. Sustainable energy policies and energy independence is key to the growth in renewable energy. Adoption of wind and solar have been spurred by falling costs such that they are cheaper than fossil fuel alternatives in a growing number of countries. Added to this, we have increasingly seen corporates undertake a greening of their energy needs, sourcing energy from renewable sources under long term purchasing power agreements. The increasing drive by countries to work towards net zero emissions by 2050 is hugely supportive. For example, the introduction and evolution of the European Green Deal is hugely significant. Indeed, policy support has in fact come centre stage globally in light of the COVID-19 related recession, highlighting the economic (as costs have fallen sharply) and societal benefits of these moves.

**Aging and insufficient infrastructure** across these essential resources needs addressing. Infrastructure in developed markets is generally aged and needs adaptation. Electricity grids in developed markets need to adapt to the growing share of intermittent renewable technologies. The building of 'smart' grids is essential for matching supply and demand of energy in this new world. Water leakage rates due to ageing infrastructure can be at unacceptable levels. Investment in agriculture infrastructure is needed to reduce the large wastage that occurs between production and consumption. Governments are increasingly recognising the need to invest in ageing infrastructure to stimulate the economy and to provide a social benefit. In developing markets, the problem is more likely to be a lack of infrastructure rather than the ageing infrastructure profile seen in developed countries.

**Advances in technology** offer the ability to improve supply, curtail demand, increase efficiency and reduce waste across food, energy and water. For example, the evolution of precision agriculture which uses the combination of data and data analysis along with technology and agronomy know how to improve crop yields, at the same enhancing the efficiency of inputs such as fertilisers and water use, thereby reducing costs and the environmental impact. Disruptive technologies such as electric vehicles and the electrification of vehicles are leading to change. Charging infrastructure for these vehicles needs to be rolled out to further enhancing adoption. Along with a fall in battery prices for electric vehicles, we see their adoption rising sharply in the years ahead.

Advances in technology are changing how we access our essential resources. They offer the ability to improve supply, curtail demand, increase efficiency and reduce waste across food, energy and water. Take for example, the evolution of precision agriculture which uses the combination of data and data analysis along with technology and agronomy know how to improve crop yields, at the same enhancing the efficiency of inputs such as fertilisers and water use, thereby reducing costs and the environmental impact.

**KBI Global Investors Ltd**

**Investment Manager's Report (Continued)****KBI 50/50 Global/Eurozone Equity Fund**

The KBI 50/50 Global/Eurozone Equity Fund registered a decline of 3.7% during the 12 months to end August 2020, underperforming the MSCI EMU Index which decreased by 2.5% and underperforming the MSCI World ex Eurozone Index which registered an increase of 8.7%. The Fund registered a decline of 4.2% during the 12 months to end August 2019 against a rise of 0.2% in MSCI EMU Index and a rise of 6.6% in the MSCI World ex Eurozone Index. The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced three distinct phases:

- 1) In the period prior to the global spread of the pandemic, the exceptional rally in global stocks continued. The balance of macro and corporate data was positive and the fear that policy may be impotent in the face of overwhelmingly negative structural forces had lessened appreciably. Against that backdrop, the early months of the year saw global stock markets set new all-time highs.
- 2) This positive period came to a shuddering halt in early March. The feared economic impact of the COVID-19 pandemic dominated all, and global stock markets suffered the fastest bear market on record.
- 3) However, from the low point on 23rd March, global stock-markets have rebounded sharply. The aggressive policy responses, the slowdown of the virus spread, and the first steps towards the lifting of lockdowns, combined to ease the extreme level of investor fear and fuel a remarkable rally to fresh all-time highs.

It was a particularly difficult period from a style perspective as growth outperformed value by a significant margin, although a feature across all regions, growth was particularly strong in North America and Europe. High yield also struggled as investors showed little interest in equity income even as interest rates continued to decline. Also, of note, small cap stocks performed poorly relative to their larger cap counterparts.

Stock selection was disappointing in technology hardware, media and entertainment and in real estate. In technology hardware, the underweight position in Apple detracted from performance as it more than doubled during the period under review. Investors are willing to pay a services like premium for the entire earnings stream. While expectations for revenues are not elevated, investors expect a strong flow through of even modest revenue upside to earnings given the largely fixed cost nature of costs in the short-term. Strong inflows from retail investors suggest that momentum is playing a significant role in the recent share price surge. In media and entertainment, Omnicom and Interpublic struggled as the lack of guidance and poor visibility weighed on the stock prices while we have no exposure to Facebook which recorded a rise of over 45%. Secular growth stocks remained in demand as investors were willing to pay a significant premium for growth given the perceived scarcity of growth while lower for longer interest rates meant that the long duration nature of their earnings was also rewarded. Publicis struggled due to a range of risks overhanging the stock from COVID-19 to question marks over the rate of attrition from existing Fast-Moving Consumer Goods clients. Investors are also focused on the risks associated with the Epsilon acquisition related to areas of the Epsilon portfolio under pressure, concern over data protection/privacy issues and over the level of debt required to complete the transaction. In real estate, Simon Property Group fell sharply in response to the COVID-19 pandemic. The likelihood that many of its retail clients would have difficulty maintaining their rental payments, coupled with uncertainty about how its creditors might respond, cast great uncertainty over the outlook. The stock price rebounded somewhat as the extraordinary level of uncertainty eased, and the first steps towards the lifting of lockdowns materialised. Klepierre was down sharply as it was hit by restrictions on public gatherings and by consumers choosing to self-isolate in order to contain the spread of COVID-19 in Europe, this had a negative impact on footfall and on related sales in malls. The company has adopted the right strategy, disposing of €7bn of non-core assets since 2012 to lower Loan to Value (LTV) in a period when malls were not under pressure. Klepierre has the second lowest LTV among retail REITs (real estate investment trusts) at 42%. Klepierre is adopting an active tenant rotation policy, shifting away from fashion, and helping brands either from online backgrounds or wholesale to define their own store customer experience.

Relative stock selection contributed positively to performance in capital goods and pharmaceuticals. In capital goods, Cummins was up sharply as investors believe that 2020 will be the trough year in the North American truck market with strong growth expected over the coming years in advance of the regulatory/emissions changes in 2024. Cummins has a unique exposure to multiple markets that are showing the best signs and potential of sustained recovery and margins are also being helped by the aggressive cost reduction programme. Siemens staged a strong recovery driven by its attractive exposure with software, manufacturing automation, healthcare and infrastructure accounting for more than 75% of its sum of parts. Siemens provides exposure to themes such as digitalisation, automation and increased public investments in healthcare and general infrastructure. Relative to other large caps it benefits from a lack of aerospace exposure and more limited non-residential construction exposure.

**Investment Manager's Report (Continued)****KBI 50/50 Global/Eurozone Equity Fund (continued)**

In pharmaceuticals, AbbVie rallied on the back of a robust outlook with several long-term drivers including Skyrizi, Rinvoq, Imbruvica, Vraylar and aesthetics. Management remain on track for \$2bn in cost synergies by 2022, positioning the company for further operating margin expansion. AbbVie plans to pay down \$15-18bn in debt by the end of 2021 leaving ample balance sheet capacity for additional business development, dividends and share buybacks.

Recordati was up strongly after it delivered another year of very strong performance with revenue growth of 9.6% and EBITDA (earnings before interest, taxes, depreciation, and amortization) growth of 9%. Growth was broad based across all businesses and geographies with organic growth of roughly 5.7% mostly driven by volume. In Q4 Recordati also closed the acquisition of Signifor, Signifor LAR and Isturisa from Novartis. The acquisition from Novartis will help Recordati become an important player in the rare disease space worldwide. The stock was given a further boost after Lancet Diabetes and Endocrinology published positive results from Phase 3 LINC-3 pivotal study of Isturisa, recently approved for the treatment of endogenous Cushing's syndrome in adults.

**Investment Outlook**

Stock markets often surprise, but the rebound of recent months has shocked many. Given the scale of economic and earnings contraction, it seemed especially strange. But in the wake of the Lehman collapse in September 2008, the global economy and banking system also faced meltdown. Many feared a re-run of the great depression. This view failed to reckon with the powerful tools available to policymakers. Crucially, the policy responses to the pandemic have seen these tools deployed with renewed and expanded aggression.

For example, negative official interest rates are the new normal in Europe and bond investors at every maturity out to 30 years are all but paying for the privilege of loaning money to many Eurozone governments. More generally, negative real long-term interest rates are now embedded globally.

Notwithstanding how economies behave in the months ahead, in the years ahead, the likelihood that many stocks will generate positive cash flows is high. In contrast to their bond brethren, long-term stock investors will likely be well compensated for risking their capital. Historically low discount rates matter. While predicting the direction of the stock market is notoriously challenging, the return of investor optimism may prove more durable than many currently fear.

**KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI Eurozone Equity Fund**

The KBI Eurozone Equity Fund registered a decline of 5.5% during the 12 months to end August 2020, underperforming the MSCI EMU Index, which declined by 2.5% (in EUR terms). The Fund registered a decline of 4.8% during the 12 months to end August 2019 against a rise of 0.2% in the MSCI EMU Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced three distinct phases:

- 1) In the period prior to the global spread of the pandemic, the exceptional rally in global stocks continued. The balance of macro and corporate data was positive and the fear that policy may be impotent in the face of overwhelmingly negative structural forces had lessened appreciably. Against that backdrop, the early months of the year saw global stock markets set new all-time highs.
- 2) This positive period came to a shuddering halt in early March. The feared economic impact of the COVID-19 pandemic dominated all, and global stock markets suffered the fastest bear market on record.
- 3) However, from the low point on 23rd March, global stock markets have rebounded sharply. The aggressive policy responses, the slowdown of the virus spread, and the first steps towards the lifting of lockdowns, combined to ease the extreme level of investor fear and fuel a remarkable rally to fresh all-time highs.

It was a particularly difficult period from a style perspective as growth outperformed value by 13.1%. High yield also struggled underperforming by 2.1% as investors showed little interest in equity income even as interest rates continued to decline. Also, of note, small cap stocks underperformed their larger cap counterparts by 3.4%.

Stock selection was disappointing in real estate, energy and media and entertainment. In real estate, Klepierre was down sharply as it was hit by restrictions on public gatherings and by consumers choosing to self-isolate in order to contain the spread of COVID-19 in Europe, this had a negative impact on footfall and on related sales in malls. The company has adopted the right strategy, disposing of €7bn of non-core assets since 2012 to lower Loan to Value (LTV) in a period when malls were not under pressure. Klepierre has the second lowest LTV among retail REITs (real estate investment trusts) at 42%. Klepierre is adopting an active tenant rotation policy, shifting away from fashion, and helping brands either from online backgrounds or wholesale to define their own store customer experience. In energy, Repsol declined as it was forced to adjust to the sharp fall in oil prices initially caused by the failure of OPEC + to agree on a production cut and subsequently by the sharp decline in demand brought about by the COVID-19 outbreak. Repsol cancelled the 2020-25 strategy presentation which it had planned to release along with its Q1 results and instead it published its "Resilience plan 2020". Repsol outlined a €350m cut in operating expenditure, a €1bn cut in organic capital expenditure from €3.8bn to €2.8bn and a €800m working capital release. Management has remained cautious on margins in H2 given high uncertainty on petroleum products demand in the case of a second coronavirus wave. Repsol is not expected to make any announcement related to the FY20 dividend before the presentation of the strategic plan (potentially in October). In media and entertainment, Publicis struggled due to a range of risks overhanging the stock from COVID-19 to question marks over the rate of attrition from existing Fast-Moving Consumer Goods clients. Investors are also focused on the risks associated with the Epsilon acquisition related to areas of the Epsilon portfolio under pressure, concern over data protection/privacy issues and over the level of debt required to complete the transaction.

Relative stock selection contributed positively to performance in transportation and in consumer durables and apparel. In transportation, Deutsche Post rallied strongly as COVID-19 is expected to lead to a structural acceleration in Business to Consumer parcel growth driven by increased e-commerce penetration. The acceleration of industry growth is likely to lead to upward pressure on margins on the back of better capacity utilisation, improved pricing and increased efficiencies. Deutsche Post is ahead of peers in transforming from letters to parcels and parcel growth can drive margin expansion given the company focus on yields and productivity. Deutsche Post offers the highest automation among its European peers because of its investment in digitalisation and sorting centres. In consumer durables and apparel, Kering recovered even though it had to deal with significant store closures in recent months. 53% of stores were closed at the end of March with one third still closed in early June although less than 20% are closed now with some of them open with reduced hours. Investors have targeted Kering several times over the past 18 months with multiple questions on the Gucci brand. Investors underestimate its more classic leather goods business and the multiple advantages that a bigger scale has brought to the brand. Valuation has not reflected Kering's shift as a pure luxury play with concurring high margin and return profile while it also has a strong track record in turning around brands with Bottega Veneta the latest illustration of this.

**Investment Manager's Report (Continued)****KBI Eurozone Equity Fund (continued)****Investment Outlook**

Stock markets often surprise, but the rebound of recent months has shocked many. Given the scale of economic and earnings contraction, it seemed especially strange. But in the wake of the Lehman collapse in September 2008, the global economy and banking system also faced meltdown. Many feared a re-run of the great depression. This view failed to reckon with the powerful tools available to policymakers. Crucially, the policy responses to the pandemic have seen these tools deployed with renewed and expanded aggression.

For example, negative official interest rates are the new normal in Europe and bond investors at every maturity out to 30 years are all but paying for the privilege of loaning money to many Eurozone governments. More generally, negative real long-term interest rates are now embedded globally.

Notwithstanding how economies behave in the months ahead, in the years ahead, the likelihood that many stocks will generate positive cash flows is high. In contrast to their bond brethren, long-term stock investors will likely be well compensated for risking their capital. Historically low discount rates matter. While predicting the direction of the stock market is notoriously challenging, the return of investor optimism may prove more durable than many currently fear.

31 August 2020

**Investment Manager's Report (Continued)****KBI North America Equity Fund**

The KBI North America Equity Fund registered a rise of 6.9% during the 12 months to end August 2020, underperforming the MSCI North America Index, which increased by 22.1% (in USD terms). The Fund registered a decline of 8.2% during the 12 months to end August 2019 against a rise of 2.1% in the MSCI North America Index (in USD terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced three distinct phases:

- 1) In the period prior to the global spread of the pandemic, the exceptional rally in global stocks continued. The balance of macro and corporate data was positive and the fear that policy may be impotent in the face of overwhelmingly negative structural forces had lessened appreciably. Against that backdrop, the early months of the year saw global stock markets set new all-time highs.
- 2) This positive period came to a shuddering halt in early March. The feared economic impact of the COVID-19 pandemic dominated all, and global stock markets suffered the fastest bear market on record.
- 3) However, from the low point on 23rd March, global stock markets have rebounded sharply. The aggressive policy responses, the slowdown of the virus spread, and the first steps towards the lifting of lockdowns, combined to ease the extreme level of investor fear and fuel a remarkable rally to fresh all-time highs.

It was a particularly difficult period from a style perspective as growth outperformed value by 47.2%. High yield also struggled underperforming by 17.3% as investors showed little interest in equity income even as interest rates continued to decline. Also, of note, small cap stocks underperformed their larger cap counterparts by 19.1%.

Stock selection was disappointing in technology hardware, media and entertainment and in real estate. In technology hardware, the underweight position in Apple detracted from performance as it more than doubled during the period under review. Investors are willing to pay a services like premium for the entire earnings stream. While expectations for revenues are not elevated, investors expect a strong flow through of even modest revenue upside to earnings given the largely fixed cost nature of costs in the short-term. Strong inflows from retail investors suggest that momentum is playing a significant role in the recent share price surge. In media and entertainment, Omnicom and Interpublic struggled as the lack of guidance and poor visibility weighed on the stock prices while we have no exposure to Facebook which recorded a rise of 57.9%. Secular growth stocks remained in demand as investors were willing to pay a significant premium for growth given the perceived scarcity of growth while lower for longer interest rates meant that the long duration nature of their earnings was also rewarded. In real estate, Simon Property Group fell sharply in response to the COVID-19 pandemic. The likelihood that many of its retail clients would have difficulty maintaining their rental payments, coupled with uncertainty about how its creditors might respond, cast great uncertainty over the outlook. The stock price rebounded somewhat as the extraordinary level of uncertainty eased, and the first steps towards the lifting of lockdowns materialised.

Relative stock selection contributed positively to performance in capital goods and pharmaceuticals. In capital goods, Cummins was up sharply as investors believe that 2020 will be the trough year in the North American truck market with strong growth expected over the coming years in advance of the regulatory/emissions changes in 2024. Cummins has a unique exposure to multiple markets that are showing the best signs and potential of sustained recovery and margins are also being helped by the aggressive cost reduction programme. In pharmaceuticals, AbbVie rallied on the back of a robust outlook with several long-term drivers including Skyrizi, Rinvoq, Imbruvica, Vraylar and aesthetics. Management remain on track for \$2bn in cost synergies by 2022, positioning the company for further operating margin expansion. AbbVie plans to pay down \$15-18bn in debt by the end of 2021 leaving ample balance sheet capacity for additional business development, dividends and share buybacks.

**Investment Outlook**

Stock markets often surprise, but the rebound of recent months has shocked many. Given the scale of economic and earnings contraction, it seemed especially strange. But in the wake of the Lehman collapse in September 2008, the global economy and banking system also faced meltdown. Many feared a re-run of the great depression. This view failed to reckon with the powerful tools available to policymakers. Crucially, the policy responses to the pandemic have seen these tools deployed with renewed and expanded aggression.

For example, negative official interest rates are the new normal in Europe and bond investors at every maturity out to 30 years are all but paying for the privilege of loaning money to many Eurozone governments. More generally, negative real long-term interest rates are now embedded globally.

**KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI ACWI Equity Fund**

The KBI ACWI Fund registered a decline of 2.3% during the 12 months to end August 2020, underperforming the MSCI ACWI Index, which increased by 7.3% (in EUR terms). The Fund registered a decline of 3.1% during the 12 months to end August 2019 against a rise of 5.4% in the MSCI ACWI Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced three distinct phases:

- 1) In the period prior to the global spread of the pandemic, the exceptional rally in global stocks continued. The balance of macro and corporate data was positive and the fear that policy may be impotent in the face of overwhelmingly negative structural forces had lessened appreciably. Against that backdrop, the early months of the year saw global stock markets set new all-time highs.
- 2) This positive period came to a shuddering halt in early March. The feared economic impact of the COVID-19 pandemic dominated all, and global stock markets suffered the fastest bear market on record.
- 3) However, from the low point on 23rd March, global stock markets have rebounded sharply. The aggressive policy responses, the slowdown of the virus spread, and the first steps towards the lifting of lockdowns, combined to ease the extreme level of investor fear and fuel a remarkable rally to fresh all-time highs.

It was a particularly difficult period from a style perspective as growth outperformed value by a significant margin, although a feature across all regions, growth was particularly strong in North America, Asia and Europe. High yield also struggled underperforming sharply as investors showed little interest in equity income even as interest rates continued to decline. Also, of note, small cap stocks performed poorly relative to their larger cap counterparts.

Stock selection was disappointing in technology hardware, media and entertainment and in real estate. In technology hardware, the underweight position in Apple detracted from performance as it more than doubled during the period under review. Investors are willing to pay a services like premium for the entire earnings stream. While expectations for revenues are not elevated, investors expect a strong flow through of even modest revenue upside to earnings given the largely fixed cost nature of costs in the short-term. Strong inflows from retail investors suggest that momentum is playing a significant role in the recent share price surge. In media and entertainment, Omnicom and Interpublic struggled as the lack of guidance and poor visibility weighed on the stock prices while we have no exposure to Facebook which recorded a rise of over 45%. Secular growth stocks remained in demand as investors were willing to pay a significant premium for growth given the perceived scarcity of growth while lower for longer interest rates meant that the long duration nature of their earnings was also rewarded. In real estate, Simon Property Group fell sharply in response to the COVID-19 pandemic. The likelihood that many of its retail clients would have difficulty maintaining their rental payments, coupled with uncertainty about how its creditors might respond, cast great uncertainty over the outlook. The stock price rebounded somewhat as the extraordinary level of uncertainty eased, and the first steps towards the lifting of lockdowns materialised.

Relative stock selection contributed positively to performance in capital goods and pharmaceuticals. In capital goods, Cummins was up sharply as investors believe that 2020 will be the trough year in the North American truck market with strong growth expected over the coming years in advance of the regulatory/emissions changes in 2024. Cummins has a unique exposure to multiple markets that are showing the best signs and potential of sustained recovery and margins are also being helped by the aggressive cost reduction programme. In pharmaceuticals, AbbVie rallied on the back of a robust outlook with several long-term drivers including Skyrizi, Rinvoq, Imbruvica, Vraylar and aesthetics. Management remain on track for \$2bn in cost synergies by 2022, positioning the company for further operating margin expansion. AbbVie plans to pay down \$15-18bn in debt by the end of 2021 leaving ample balance sheet capacity for additional business development, dividends and share buybacks.

In emerging markets, poor stock selection in retailing detracted from performance. Home Product Centre declined as management tone was quite downbeat on the worsening spending outlook from job/income losses and the ending of the pandemic stimulus package. We have no exposure to Alibaba which was sharply higher over the period. The Q2 growth rate of combined customer management revenue and commission revenue of China retail marketplace was back to the December 2019 level, the negative impact from COVID-19 is now largely behind it.

**Investment Manager's Report (Continued)****KBI ACWI Equity Fund (continued)****Investment Outlook**

Stock markets often surprise, but the rebound of recent months has shocked many. Given the scale of economic and earnings contraction, it seemed especially strange. But in the wake of the Lehman collapse in September 2008, the global economy and banking system also faced meltdown. Many feared a re-run of the great depression. This view failed to reckon with the powerful tools available to policymakers. Crucially, the policy responses to the pandemic have seen these tools deployed with renewed and expanded aggression.

For example, negative official interest rates are the new normal in Europe and bond investors at every maturity out to 30 years are all but paying for the privilege of loaning money to many Eurozone governments. More generally, negative real long-term interest rates are now embedded globally.

In emerging markets, policymakers across the region have responded with a range of fiscal and monetary measures to offset the growth shock. Initial indications out of China have been promising as activity has been returning to normal, if other countries behave in a similar fashion the economic impact may be significant but short-lived.

On the positive side, emerging market companies have been focusing on profits as the cycle matured, capex to sales is at the lowest level since 1995 and the corporate sector was already aware that nominal GDP (gross domestic product) growth would be lower. Total dividends were higher than ever, and emerging markets represent the least leveraged part of the global investment universe.

Notwithstanding how economies behave in the months ahead, in the years ahead, the likelihood that many stocks will generate positive cash flows is high. In contrast to their bond brethren, long-term stock investors will likely be well compensated for risking their capital. Historically low discount rates matter. While predicting the direction of the stock market is notoriously challenging, the return of investor optimism may prove more durable than many currently fear.

**KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI Integris Global Equity Fund**

The KBI Integris Global Equity Fund registered a rise of 0.7% during the 12 months to end August 2020, underperforming the MSCI World Index, which increased by 7.5% (in EUR terms). The Fund registered a decline of 0.4% during the 12 months to end August 2019 against a rise of 5.9% in the MSCI World Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced three distinct phases:

- 1) In the period prior to the global spread of the pandemic, the exceptional rally in global stocks continued. The balance of macro and corporate data was positive and the fear that policy may be impotent in the face of overwhelmingly negative structural forces had lessened appreciably. Against that backdrop, the early months of the year saw global stock markets set new all-time highs.
- 2) This positive period came to a shuddering halt in early March. The feared economic impact of the COVID-19 pandemic dominated all, and global stock markets suffered the fastest bear market on record.
- 3) However, from the low point on 23rd March, global stock-markets have rebounded sharply. The aggressive policy responses, the slowdown of the virus spread, and the first steps towards the lifting of lockdowns, combined to ease the extreme level of investor fear and fuel a remarkable rally to fresh all-time highs.

It was a particularly difficult period from a style point of view as growth outperformed value by 34.2%, although a feature across all regions, growth was particularly strong in North America and Europe. High yield also struggled underperforming by 13.8% as investors showed little interest in equity income even as interest rates continued to decline. Also, of note, small cap stocks performed poorly relative to their larger cap counterparts. The Fund has an ESG (environmental, social and governance) score of 7.3 as against 6.3 for the benchmark.

Stock selection was disappointing in technology hardware, media and entertainment and in real estate. In technology hardware, the underweight position in Apple detracted from performance as it more than doubled during the period under review. Investors are willing to pay a services like premium for the entire earnings stream. While expectations for revenues are not elevated, investors expect a strong flow through of even modest revenue upside to earnings given the largely fixed cost nature of costs in the short-term. **KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI Global Sustainable Infrastructure Fund**

The KBI Global Sustainable Infrastructure Strategy generated a positive return of +5.8% for the 12 month period to end August 2020 outperforming the S&P Global Infrastructure Index which posted a -17.2% loss (in EUR terms). The Fund generated a positive return of +14.1% for the 12 month period to end August 2019 underperforming the S&P Global Infrastructure Index which posted a +16.2% gain (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus. Across the three underlying sectors utilities generated the strongest returns followed closely by infrastructure capex (capital expenditure). The final sector, asset owners generated positive returns, albeit it was the weakest of the three sectors.

Absolute performance was solid over the period due largely to the strategy's high weight to asset classes less susceptible to slowing economic growth. During the period we endured a very volatile period for equity markets with economic growth plunging and unemployment sharply rising in March following the lockdowns. While the Covid-19 pandemic is still present, economies have begun to re-open and the impact to the global economy has been less severe than originally feared. Central banks and governments reacted quickly to stimulate both credit markets and unemployment benefits. As a result, we experienced a V-shaped recovery in equity markets but underneath the hood, a huge dispersion in returns across sectors. The sectors more vulnerable to a lockdown such as traditional energy and transportation were hit hard; part of the reason for the strategy's strong performance over the period is driven by the poor returns from toll roads, airport operators and MLPs which have all been hit hard by the pandemic. On the other hand, expenditure on clean energy infrastructure has not experienced a material slowdown and government support for climate change initiatives has accelerated in recent months. There is growing anticipation that stimulus packages won't be enacted that compromise climate change objectives; as a result we expect incentives to accelerate wind and solar growth. The European Union for instance unveiled a €750 billion recovery package for the coronavirus pandemic last week with the transition to green energy and climate change at the heart of it. While in the US, Joe Biden has promised to spend \$2tr over the next 4 years on clean energy infrastructure should he win the US election in November 2020.

Against this favourable regulatory backdrop the strategy performed very well against other listed infrastructure asset classes. Strong Utility performance was principally driven by strong returns from European names as Asian and UK names lagged somewhat. Leading clean energy names such as Enel, Iberdrola and Nextera performed particularly well during the period.

**Top 3 Contributors:**

**Hannon Armstrong:** Hannon Armstrong is a specialty financing company which invests in long duration renewable energy and energy efficiency projects. Shares underperformed during March amid uncertainty over widening credit spreads. Shares recovered strongly as the company successfully raised debt and reassured the market on both its liquidity position and its earnings guidance.

**Gladstone Land:** Gladstone Land is a real estate trust which owns farmland across 10 US states and leases the land to independent farmers on a triple net basis, meaning the farmer pays the rent, insurance, maintenance and taxes. During the period, the company announced solid quarterly results and 2 new acquisitions. We see Gladstone as well positioned in the current environment since the bulk of its produce is sold to grocery stores where demand for fresh produce has spiked due to the impacts of the pandemic.

**Enel:** Enel is a leading owner and operator of renewable and grid infrastructure assets across Europe and the Americas. During the period shares performed well as the company reported minimal impact from the Covid-19 pandemic. Enel has experienced little disruption across its supply chain while growth visibility has not deteriorated for most of its end markets. The ambitious EU climate change targets (-55% CO<sub>2</sub> (carbon dioxide) reduction vs 1990 levels) should accelerate the pace of wind and solar adoption across the EU. This should enable Enel to continue to earn superior earnings growth versus other listed utilities.

**Investment Outlook**

The Global Sustainable Infrastructure fund invests in a diversified portfolio of owners and operators of infrastructure assets as well as companies exposed to increased infrastructure capex spend. The portfolio invests in long duration assets within Water, Clean Energy and Agri business end markets. Importantly, the bulk of the end markets within the portfolio are not tied to the economic cycle and have minimal commodity price exposure. The strategy looks to invest in long term infrastructure assets which are producing predictable cash flows (often inflation-linked). The portfolio is diversified across multiple geographies and exposed to multiple different regulatory environments. When building the portfolio, we aim to provide exposure to stable regulatory environments. Significant demographic changes (such as population growth, emerging market middle class growth and urbanization etc.) are set to raise demand for each of these resources sharply over coming decades. However, there are significant supply constraints across each of these essential resources. Increased regulations and environmental concerns are also playing an ever-increasing role in the adoption of sustainable and cleaner supply of these resources.

**Investment Manager's Report (Continued)****KBI Global Sustainable Infrastructure Fund (continued)****Investment Outlook (continued)**

In the wake of the Covid-19 pandemic, we expect governments to accelerate plans to prioritise infrastructure spending over the coming months. Crucially within the stimulus packages to be announced, we expect governments to focus on green incentive schemes. Already we are seeing evidence of this in Europe. While the US federal support will likely lag over the near term, the forthcoming US presidential election looms large on the horizon. A potential democrat victory could result in greater focus on clean energy incentives.

There is likely to be a significant fall in GDP across the globe in quarter 2 – Lower interest rates and quantitative easing will not be enough to stimulate economic growth. Rising unemployment, deteriorating consumer and business sentiment is likely further weigh on economic growth. We believe governments are aware of the critical role infrastructure investment could play in re igniting economic growth in second half of 2020 and 2021. While we now expect global CO2 emissions to decline for the first time in 2020, we do not anticipate government commitment to lowering emissions will wane.

Utilities is the largest sector weighting within the portfolio. The strategy invests in regulated Utilities across stable operating environments whereby earnings are typically linked to movement in inflation. This encompasses a wide variety of end markets including grid operators, clean energy Utilities, Water and waste water Utilities. A key attraction to investing in this space is the stable and predictable earnings visibility inherent in our Utilities business model. The strategy's exposure to clean energy Utilities and Water Utilities is a key differentiator given the significant capex spend required to upgrade our aging grid and water infrastructure. The strategy is well diversified across regions with meaningful exposure to four regions across both Water and clean energy end markets: North America, Eurozone, UK and Emerging Markets.

Asset owners is the second largest weight within the strategy and encompasses owners of long duration infrastructure assets across multiple end markets, including as Yield cos, Waste to energy companies, and Farmland REITS (real estate investment trusts).

Infrastructure capex remains the lowest sector weight in the portfolio; this sector provides exposure to companies more geared towards near term toward infrastructure spend. The portfolio is exposed to multiple end markets including engineering and consulting firms, maintenance services and project management for infrastructure projects. Earnings visibility across this sector are typically backed up by long term projects which can stretch to multiple years of backlog activity. End markets tend to be more geared towards spending plans that are underpinned by strategic national needs, regulatory commitments or essential maintenance requirements opportunities.

**KBI Global Investors Ltd**

31 August 2020

**Investment Manager's Report (Continued)****KBI Diversified Growth Fund****Investment Manager Report for the period since launch (26/11/2019 to 31/08/2020)**

The KBI Diversified Growth Fund launched on 26/11/2019. The Fund declined by -4.1% in the period from launch to end August 2020. The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the period, the MSCI World Equity index fell marginally, by 0.2% in euro terms, and the Merrill Lynch over 5-year EMU Government Bond Index rose by +1.7%. From a regional perspective, European equities fell by 9.9%, North American equities rose by 4.5%, and Pacific ex Japan equities fell by 11.0%. Emerging markets declined by 1.3%. The Bloomberg Commodities Index declined by -13.6%, while hedge fund returns were also negative (all returns are in euro terms). On the currency front, the euro was strong against both the US Dollar (up 8.6%) and Sterling (up 4.1%). Perhaps the most notable feature of markets, however, was the marked outperformance of "growth" stocks relative to "value" stocks. The MSCI World Value index fell by 18.1% while the MSCI World Growth index rose by 14.8%, an outperformance of 32.9%.

**Investment Outlook**

Covid19 has had a dramatic impact on the global economy, pushing all major economies into deep recessions. Although most economies have had a strong rebound after a period of effective shutdown, it appears unlikely that economic activity will return to pre-crisis levels until well into 2021. A key variable is when a vaccine will be widely available and distributed to the public.

Fortunately, inflation remains low, which has allowed monetary policy makers and fiscal authorities scope to ease policy, which has helped to offset some of the damage to the economy. However, undoubtedly many companies will find themselves in severe difficulties despite the measures being taken by governments, central banks and bank regulators.

Global equity valuations are high relative to history, with Europe and emerging markets the most attractive on a valuation basis – though valuation metrics are less than usually useful given the uncertainty about the shape and speed of the economic recovery. We remain wary of the valuation of momentum stocks and sectors.

**KBI Global Investors Ltd**

31 August 2020

**Responsible Investment Activities Report prepared by the Investment Manager****Background Information:**

KBI Global Investors Ltd has a strong commitment to Responsible Investing issues, and has managed Responsible Investment strategies for more than two decades. We have been a signatory of the United Nations Principles for Responsible Investment since 2007. Internally we have robust Responsible Investment controls, policies and processes in place that govern our activities and a high-level Responsible Investing Committee to oversee all aspects of Responsible Investment policy and implementation (membership includes three of the five Executive Directors of the firm).

**Integration:**

Environmental and Social factors are a fundamental underpinning of our Natural Resource Strategies, grounding the investment premise for our Water, Energy Solutions, Sustainable Infrastructure and blended strategies. Our team applies its expertise to evaluate the investment implications of environmental challenges, evolving world demographics, and opportunities in environmental solutions and then integrates these assessments into the overall fundamental assessment of companies. The Environmental, Social and Governance (“ESG”) performance of a company is reviewed as part of our fundamental analysis of a company, and is a highly material factor in all investment (buy/sell/position sizing) decisions. We have determined, and published on our website, a list of material ESG factors which we take into account when assessing the ESG performance of a company. We Engage with companies where we identify particular Environmental, Social or Governance risks or issues. We also measure the impact of our strategies (using alignment with the United Nations Sustainable Development Goals (“SDG”) as a proxy), using our Revenue Aligned SDG Score (“RASS”) methodology.

Responsible Investing is explicitly integrated into our Global Equity Strategies. We believe that there is a connection between dividend payments and corporate governance standards. Identifying companies with the ability to pay sustainable dividends, we believe, is a unique way to identify better governed companies, particularly in emerging markets. Firm-level corporate governance provisions matter more in countries with weaker legal environments or political instability and better governance is typically associated with higher dividend pay-outs. While equity investors can receive returns through capital gains or dividends, agency theory indicates that shareholders may prefer dividends, particularly when they fear expropriation by insiders; have concerns over the motivations of management; or there is a weak regulatory environment. These portfolios are constructed so that the overall ESG rating of each portfolio is materially higher than the benchmark. The Environmental, Social and Governance performance of a company is reviewed as part of our fundamental analysis of a company, and is a material factor in all investment (buy/sell/position sizing) decisions. We engage with companies where we identify particular Environmental, Social or Governance risks or issues. Some portfolios also exclude investment in certain controversial sectors as determined by the Responsible Investing committee, and exclude investments in companies that score the worst overall ESG grade (“CCC”) from MSCI ESG Research.

**Developments at the firm:**

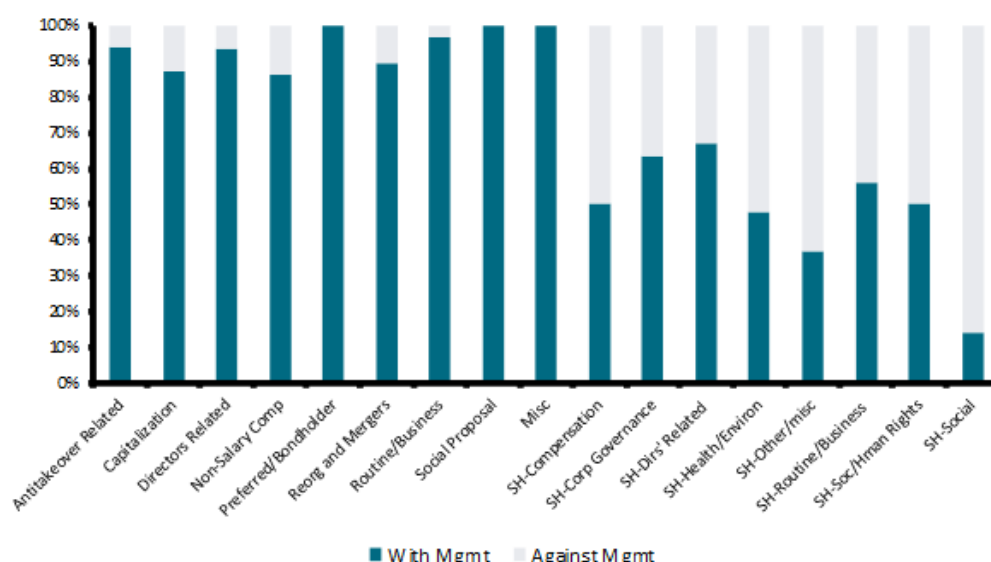

- We are pleased to report that for the fourth consecutive year, the PRI (United Nations Principles for Responsible Investment) awarded us the maximum “A+” rating for all firm-wide and equity-related components (Strategy and Governance, Listed Equity – Incorporation, Listed Equity – Active Ownership) in the PRI’s annual assessment of our Responsible Investment activities. The methodology and full report are available on request.
- We extended our house policy screen. All portfolios do not invest in companies involved with the manufacturing or distribution of land mines, cluster bombs, depleted uranium, biological and chemical weapons. We also do not invest in companies that repeatedly violate one or more of the ten principles of the UN Global Compact. We furthermore exclude companies which are involved in large-scale coal extraction or coal-fired electricity generation.
- We published a whitepaper on ‘ESG distribution and performance’, based on a region by region analysis of MSCI ESG ratings and performance.
- We now consider carbon intensity in the investment process for our Global Equity Strategies.
- We released the 2019 update of our Revenue Aligned SDG Scores, measuring the Impact of our natural resource strategies in terms of how the portfolios’ revenues are aligned with achieving the United Nations Sustainable Development Goals.
- We participated in a number of collaborative engagements (more detail below), usually on the topics of climate change and the disclosure of environmental information which have been identified by us as being our strategic areas of focus for engagement, both collaboratively and on a bilateral basis.

**Responsible Investment Activities Report prepared by the Investment Manager (Continued)****Proxy Voting**

We vote all securities that we are entitled to vote on behalf of our client portfolios. Proxies are voted in a manner which serves the long-term best interests of the portfolio.

In the year to August 2020, as a firm, we voted at 981 meetings worldwide for all our strategies. We voted against management in 8.2% of all proposals, and we voted against management on 40% of shareholder proposals. Shareholder proposals are initiatives put forward by shareholders, usually requesting management to take action on particular issues.

In the year to 31 August 2020, for the sub-funds of KBI Funds ICAV specifically, we voted at 590 meetings worldwide.

**Management and Shareholder Proposals****Engagement**

As a specialist boutique asset manager with focused resources, we endeavour to leverage relationships to engage in collective engagement when appropriate. We are members of The United Nations Principles for Responsible Investment Climate Action 100+, The Institutional Investors Group on Climate Change (IIGCC), The Carbon Disclosure Project (CDP) and the CERES (Coalition for Environmentally Responsible Economies) Investors Network on Climate Risk.

Examples of collaborative engagement over the year include:

- We continue to participate in Climate Action 100+ (CA 100+), an initiative led by some of the biggest investors and investor networks, including the PRI and the four main European, US and Asian climate change organisations (including IIGCC and CERES), to engage with the world's largest corporate greenhouse gas emitters to curb emissions, strengthen climate-related financial disclosures and improve governance on climate change. As part of CA 100+, we are part of the groups of investors leading engagement with a large Italian manufacturer and distributor of electricity and gas, a large Chinese oil company, a multinational chemical company and an American forest and paper company.
- We signed a CA100+ letter to the Ministry of Economy and Finance ("MOEF") of South Korea, a majority shareholder of Korea Electric Power Company ("KEPCO") on the subject of overseas coal-fired power projects that KEPCO is currently considering an investment in. A total of US\$5.86 trillion AUM supported the letter.
- We signed a CA100+ lead engagement statement made at Total SA's 2020 AGM in support of Total's ambition to achieve net zero emissions by 2050 across its operations and products.

**Responsible Investment Activities Report prepared by the Investment Manager (Continued)****Engagement (continued)**

- With other investors, we wrote to ENI SpA, to express concerns on how climate risks are treated in its annual accounts, e.g. energy price assumption, and copied its auditors.
- We signed a PRI Statement of Investor Commitment to Support a Just Transition on Climate Change.
- We supported an investor initiative to encourage improvements in corporate practice and performance on farm animal welfare through commending good practice and encouraging poor performers to improve. Joined the Business Benchmark on Farm Animal Welfare (BBFAW). As part of BBFAW collaboration, we wrote to 150 benchmarked food companies commenting on their performance in the 2019 BBFAW assessment and suggesting ways in they can improve in the 2020 assessment.
- We endorsed a PRI statement of investor expectations re the Responsible Sourcing of Cobalt. Cobalt is used in lithium-ion batteries that form an integral part of mobile phones, laptops and electric cars. The Democratic Republic of Congo holds close to 50% of the world's reserves. 20% of the country's cobalt is extracted by miners where serious systemic human rights violations are commonplace; including child labour, health hazards from toxic metals and lack of safety in the mines.
- We signed a PRI and CERES coordinated letter asking companies to commit and increase efforts to eliminate deforestation in their operations and supply chains in Brazil and around the globe.
- We co-signed an IIGCC letter to EU leaders, ahead of a key EU summit meeting, requesting that the EU adopt a near-zero emissions target for 2050 at the latest.
- We co-signed an IIGCC letter to EU policymakers regarding methane emissions. We asked that a legislative proposal be drawn up which would specify a threshold for the intensity of upstream supply for all gas sold in the EU by 2025, the pursuit of a high level of accuracy in emissions measurements, and the incorporation of robust corporate disclosures to support investor confidence and decision-making.
- We joined a collaborative group working with auditors and audit committees to ask if they have included climate change risk in financial, targeted largely at fossil fuel companies. The group has received responses from Chairs/Lead Partners of audit firms. There has been significant progress with Total and Shell and BP.
- We endorsed a CERES coordinated investor statement to support the mining sector in its transition towards more responsible water management. The statement recommends various measures covering disclosure, implementation, site-level water management, accountability and collaboration.
- We signed up to a collaborative engagement initiative by the CDP, targeting high-impact companies. CDP will engage with a selected 1900 high impact companies on committing and setting Science Based Targets aligned with 1.5°C temperature scenarios and approved by the Science Based Targets Initiative.

**Directors' Report**

The Directors present herewith the Annual Report and Audited Financial Statements of KBI Funds ICAV (the "ICAV") for the financial year ended 31 August 2020.

**Statement of Directors' Responsibilities**

The Directors are responsible for preparing the Directors' Report and financial statements, in accordance with applicable law and regulations.

The Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU and applicable law.

The financial statements are required to give a true and fair view of the assets, liabilities and financial position of the ICAV at the end of the financial year and of the profit or loss of the ICAV for the financial year. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRS as adopted by the EU; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the ICAV will continue in business.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the ICAV and enable them to ensure that the financial statements comply with the ICAV Act, (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, (S.I. 352 of 2011) (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the ICAV. In this regard they have entrusted the assets of the ICAV to a Depositary for safe-keeping. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities. The directors are also responsible for preparing a Directors' Report that complies with the requirements of the ICAV Act.

**Principal Activities**

A detailed review of the ICAV's activities for the financial year ended 31 August 2020 is included in the Investment Manager Reports.

**Review of Business and Future Developments**

A review of business and future developments is included in the Background to the ICAV on pages 2 to 6 and the Investment Manager's Reports on pages 7 to 31.

**Results and Dividends**

The results and dividends for the financial year are set out in the Statement of Comprehensive Income on pages 44 to 47.

**Risk Management Objectives and Policies**

The main risks arising from the ICAV's financial instruments are market price, foreign currency, interest rate, liquidity and counterparty credit risks as detailed in Note 2 to these financial statements.

**Remuneration**

The Directors of the ICAV who are also employees of the investment manager are not entitled to any remuneration in respect of their services as Directors of the ICAV.

Effective from 1 January 2020, Fiona Mulcahy's fee increased to EUR 29,000 per annum and Frank Joseph Close's fee increased to EUR 24,000 per annum. The total fee earned for the financial year ended 31 August 2020 was EUR 26,000 and EUR 22,667 respectively. This is detailed in Note 17. None of the Directors are currently in receipt of variable remuneration in respect of their services as Directors of the ICAV and none of the Directors are currently in receipt of a pension from the ICAV. An annual review has been undertaken and no material changes have been made to the remuneration policy.

**Directors' Report (Continued)****Remuneration (Continued)**

The Remuneration Policy of the ICAV can be viewed on the website of the Investment Manager at [www.kbiglobalinvestors.com](http://www.kbiglobalinvestors.com).

**Events during the Financial Year**

A new prospectus was issued dated 13 February 2020.

Effective 13 February 2020, as approved by the Central Bank, the name changed from KBI Institutional Fund ICAV to KBI Funds ICAV.

Effective 13 February 2020, approved by the Central Bank, the names of the funds changed as follows:

KBI Institutional Energy Solutions Fund changed to KBI Energy Solutions Fund.

KBI Institutional Water Fund changed to KBI Water Fund.

KBI Institutional Emerging Markets Equity Fund changed to KBI Emerging Markets Equity Fund.

KBI Institutional Developed Equity Fund changed to KBI Developed Equity Fund.

KBI Institutional GRS Fund changed to KBI Global Resource Solutions Fund.

KBI Institutional Global Equity Fund changed to KBI Global Equity Fund.

KBI Institutional 50/50 Global/Eurozone Equity Fund changed to KBI 50/50 Global/Eurozone Equity Fund.

KBI Institutional Eurozone Equity Fund changed to KBI Eurozone Equity Fund.

KBI Institutional North America Equity Fund changed to KBI North America Equity Fund.

KBI Institutional ACWI Equity Fund changed to KBI ACWI Equity Fund.

KBI Institutional Global Sustainable Infrastructure Fund changed to KBI Global Sustainable Infrastructure Fund.

KBI Diversified Growth Fund launched 26 November 2019.

The Security Lending Programme was suspended on 22 April 2020 and remained in suspension throughout the remainder of the financial year.

The following share classes launched during the financial year:

	<b>Launch Date</b>
KBI Energy Solutions Fund Euro Class G Shares	29 October 2019
KBI Global Resource Solutions Fund Euro Class G Shares	29 October 2019
KBI Integris Global Equity Fund Euro Class H (Distributing) Shares	18 June 2020
KBI Global Sustainable Infrastructure Fund Euro Class B Shares	28 November 2019
KBI Global Sustainable Infrastructure Fund Euro Class D (Distributing) Shares	28 January 2020
KBI Global Sustainable Infrastructure Fund Euro Class F (Distributing) Shares	12 May 2020

The following share classes closed during the financial year:

	<b>Termination Date</b>
KBI Water Fund Class G Shares	30 September 2019
KBI Emerging Markets Equity Fund Sterling Class B(Distributing) Shares	23 May 2020
KBI Emerging Markets Equity Fund US Dollar Class B Shares	22 October 2019
KBI Developed Equity Fund US Dollar Class B (Distributing) Shares	16 April 2020
KBI ACWI Equity Fund Sterling Class D (Distributing) Shares	31 January 2020

**COVID-19**

The COVID-19 virus pandemic continues to impact countries and economies across the globe. The Directors are aware that global financial markets are still monitoring and reacting to the outbreak. All markets have incurred increased volatility and uncertainty since the onset of the virus.

The Directors have also noted the operational risks that are posed to the ICAV and its service providers due to global and local movement restrictions that have been enacted by various governments. The COVID-19 pandemic is an unprecedented event and the eventual impact on the global economy and markets will largely depend on the scale and duration of the outbreak.

The Directors will continue to monitor this situation.

There have been no other events during the financial year end, which, in the opinion of the Directors of the ICAV, may have had an impact on the financial statements for the financial year ended 31 August 2020.

**Directors' Report (Continued)****Post Balance Sheet Events**

The COVID-19 outbreak has caused extensive disruption to businesses and economic activities globally. The uncertainty and instability described in Note 22 continues post financial year-end.

The ICAV has agreed to recommence securities lending subject to agreement with the agent lender on its obligations concerning the Securities Financing Transactions Regulation ("SFTR").

There have been no other events subsequent to the financial year end, which, in the opinion of the Directors of the ICAV, may have had an impact on the financial statements for the financial year ended 31 August 2020.

**Directors**

The Directors who held office during the financial year as at 31 August 2020 were:

Frank Joseph Close (Independent)

Fiona Mulcahy (Independent)

Padraig Sheehy

Gerard Solan (Chairman)

Derval Murray

Patrick Cassells

The table below shows the Directors' interests in the Funds of the ICAV at 31 August 2020:

	<b>KBI Energy Solutions Fund</b>	<b>KBI Water Fund</b>	<b>KBI Emerging Markets Equity Fund</b>	<b>KBI Developed Equity Fund</b>	<b>KBI Global Resource Solutions Fund</b>
Padraig Sheehy	36	12	570	265	11
Gerard Solan	-	-	-	810	-

**Directors' Report (Continued)****Directors (Continued)**

	<b>KBI Global Equity Fund</b>	<b>KBI Eurozone Equity Fund</b>	<b>KBI Global Sustainable Infrastructure Fund</b>
Padraig Sheehy	-	-	425
Gerard Solan	21,779	3,696	3,267
Derval Murray	115	172	1,633
Patrick Cassells	10,640	-	393

Each of Mr Padraig Sheehy, Mr Gerard Solan, Ms Derval Murray and Mr Patrick Cassells are employees of KBI Global Investors Limited, the Investment Manager to the ICAV.

**Shares Schemes**

Mr Solan, Mr Cassells, Ms Murray and Mr Sheehy are all employees of the Investment Manager and have been allocated shares in the funds of the ICAV as part of their variable employee remuneration package. These shares were allotted through the Investment Manager's Irish Revenue approved profit sharing scheme 'APSS'. Below is a statement of their holdings at 31 August 2020:

	<b>KBI Developed Equity Fund</b>	<b>KBI Emerging Markets Equity Fund</b>	<b>KBI Global Resource Solutions Fund</b>	<b>KBI Global Sustainable Infrastructure Fund</b>
Patrick Cassells	295	-	-	665
Derval Murray	1,144	-	88	1,633
Padraig Sheehy	265	540	11	656
Gerard Solan	810	-	-	4,866

The shares are included within Directors' interests in the Funds of the ICAV as disclosed on page 37.

**Transactions Involving Directors**

Derval Murray and Gerard Solan are also Directors of the Investment Manager. There are no other contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors or Secretary had any interest as defined in the Act, at any time during the financial year.

**Accounting Records**

The Directors believe that they have complied with the requirements of Sections 109 to 115 of the ICAV Act 2015, with regard to keeping adequate accounting records. The Directors have appointed Northern Trust International Fund Administration Services (Ireland) Limited to maintain adequate accounting records. The address at which this business is located is as follows:

Georges Court  
54-62 Townsend Street  
Dublin 2  
Ireland

**Directors' Report (Continued)****Transactions with Connected Persons**

Any transaction carried out with a UCITS by a manager, depositary, investment adviser and/or associated or group companies of these ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the financial period complied with the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations.

**Independent Auditors**

In accordance with Section 125 of the ICAV Act 2015, Deloitte Ireland LLP, Chartered Accountants and Statutory Audit firm, have expressed their willingness to continue in office as the ICAV's auditors.

**Going Concern**

The Directors have a reasonable expectation that the ICAV has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the Financial Statements.

**Corporate Governance Code**

Irish Funds, the association for the funds industry in Ireland, has published a corporate governance code that may be adopted on a voluntary basis by Irish authorised investment funds. The Board of Directors has adopted the Code, and the ICAV was in compliance with all elements of the Code during the financial period.

The text of the Code is available from the Irish Funds website, [www.irishfunds.ie](http://www.irishfunds.ie).

**On Behalf of the Board of Directors**

**Gerard Solan**  
Director

**Patrick Cassells**  
Director

**9 December 2020**

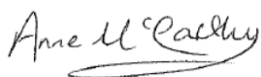

**Depository Report to the Shareholders**

We, Northern Trust Fiduciary Services (Ireland) Limited (“NTFSIL”), appointed Depositary to KBI Funds ICAV (the “ICAV”) provide this report solely in favour of the shareholders of the ICAV for the period from 1 September 2019 to 31 August 2020 (the “Annual Accounting Period”). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011), as amended, Directive 2009/65/EU which implemented into Irish Law (the “Regulations”). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the ICAV for the Annual Accounting Period and we hereby report thereon to the shareholders of the ICAV as follows;

We are of the opinion that the ICAV has been managed during the Annual Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the constitutional documents and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional document and the Regulations.

**For and on behalf of**

**Northern Trust Fiduciary Services (Ireland) Limited**  
**9 December 2020**

**INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF KBI FUNDS ICAV****Report on the audit of the annual accounts****Opinion on the annual accounts of KBI Funds ICAV (the "ICAV")**

In our opinion the annual accounts:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 August 2020 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and applicable regulations.

The annual accounts we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets attributable to holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related Notes 1 to 25, including a summary of significant accounting policies as set out in Note 1.

The relevant financial reporting framework that has been applied in their preparation is the Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") and International Financial Reporting Standards ("IFRS") as adopted by the European Union (the "relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (the "applicable Regulations").

**Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the annual accounts" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the annual accounts in Ireland, including the Ethical Standard issued by the Irish Accounting and Auditing Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Conclusions relating to going concern**

We have nothing to report in respect of the following matters in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in preparation of the annual accounts is not appropriate; or
- the directors have not disclosed in the annual accounts any identified material uncertainties that may cast significant doubt about the ICAV's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the annual accounts are authorised for issue.

**Other information**

The directors are responsible for the other information. The other information comprises the information included in the annual report, other than the annual accounts and our auditor's report thereon. Our opinion on the annual accounts does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

**INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF KBI FUNDS ICAV (Continued)****Other information (Continued)**

In connection with our audit of the annual accounts, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual accounts or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the annual accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

**Responsibilities of directors**

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of annual accounts that give a true and fair view and have been properly prepared in accordance with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

**Auditor's responsibilities for the audit of the annual accounts**

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

As part of an audit in accordance with ISAs (Ireland), we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the ICAV's internal control;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors;
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ICAV's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of the auditor's report. However, future events or conditions may cause the entity (or where relevant, the group) to cease to continue as a going concern; and
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that the auditor identifies during the audit.

**INDEPENDENT AUDITORS' REPORT TO THE SHAREHOLDERS OF KBI FUNDS ICAV (Continued)****Auditor's responsibilities for the audit of the annual accounts (Continued)**

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1)(b) of the ICAV Act 2015. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

**Report on other legal and regulatory requirements****Matters on which we are required to report by the ICAV Act**

In our opinion, the information given in the directors' report is consistent with the annual accounts and the directors' report has been prepared in accordance with the ICAV Act.

**Matters on which we are required to report by exception**

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

**Opinion on other matters prescribed by the applicable Regulations**

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit;
- In our opinion the accounting records of the ICAV were sufficient to permit the financial statements to be readily and properly audited; and
- The financial statements are in agreement with the accounting records.

**Darren Griffin**

**Notes to the Financial Statements****For the financial year ended 31 August 2020****1. Significant Accounting Policies****a) Basis of Preparation**

The financial statements of KBI Funds ICAV (the "ICAV") are prepared in accordance with International Financial Reporting Standards as adopted by the European Union ("IFRS") and interpretations adopted by the International Accounting Standards Board ("IASB"), and Irish statute comprising the Irish Collective Asset-management Vehicles Act 2015 and pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

The preparation of financial statements in conformity with IFRS requires the ICAV to make use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

In preparing the Statement of Cash Flow under IFRS, cash and cash equivalents in hand, highly liquid interest bearing securities with original maturities of three months or less and bank overdrafts.

The financial statements have been prepared on a going concern basis. The ICAV is able to meet all of its liabilities from its assets. The performance and risks of the ICAV and its sub-funds are reviewed on a regular basis throughout the financial period. Therefore, the Directors believe that the ICAV will continue in operational existence for the foreseeable future and is financially sound. The Directors are satisfied that, at the time of approving the financial statements, it is appropriate to adopt the going concern basis in preparing the financial statements of the ICAV.

**International Financial Reporting Standards**

These financial statements have been prepared to existing standards and amendments to existing standards effective 1 September 2019.

**IFRIC Interpretation 23, 'Uncertainty over Income Tax Treatments' ("IFRIC 23")**

IFRIC 23 is effective for annual reporting periods beginning on or after 1 January 2019 and aims to clarify how to reflect uncertainty in the recognition and measurement of income taxes under IAS 12.

An assessment has been carried out by the Investment Manager and the new standard does not have a significant impact on the Funds financial position, performance or disclosures in its Financial Statements.

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV.

**Comparative Figures**

The comparative figures for the financial statements are for the year ended 31 August 2019. The formats of comparative disclosures have been amended to be consistent with the current year format of presentation.

**b) Investments****i. Classification, Recognition and Derecognition**

IFRS 9 sets out the requirements for recognition and measurement of all financial assets and financial liabilities including derivative instruments. The ICAV has classified all financial instruments as financial assets or financial liabilities at fair value through profit or loss ("FVTPL").

The ICAV recognises financial assets and financial liabilities when all significant rights and access to the benefits from the assets and the exposure to the risks inherent in those benefits are transferred to the Fund. The ICAV derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the Fund. On initial recognition, the Fund classifies financial assets as measured at amortised cost or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****1. Significant Accounting Policies (Continued)****b) Investments (continued)****i. Classification, Recognition and Derecognition (continued)**

The category of financial assets and financial liabilities at fair value through profit or loss comprises:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows;
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest.

All other financial assets of the Fund are measured at FVTPL.

**Business model assessment**

In making an assessment of the objective of the business model in which a financial asset is held, the Fund considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Fund's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Fund's continuing recognition of the assets.

The Fund has determined that it has two business models:

- Held-to-collect business model: this includes cash and cash equivalents, balances due from brokers and receivables from reverse sale and repurchase agreements. These financial assets are held to collect contractual cash flow.
- Other business model: this includes equity investments, P-notes, derivatives and fund of funds. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Financial assets that are classified under amortised cost include time deposits, due from brokers, deposits and accounts receivable.

Financial liabilities that are attributable to changes in the credit risk of that liability be presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss, but are instead transferred to retained earnings when the financial liability is derecognised.

Financial liabilities arising from Redeemable Shares issued by a Fund are carried at the redemption amount, representing the Investor's right to a residual interest in that Fund's assets.

Financial liabilities carried at amortised cost include bank overdraft, accounts and other payables.

A regular way purchase of financial assets is recognised using trade date accounting. From this date, any gains and losses, arising from changes in fair value of the financial assets or financial liabilities, are recorded on an average cost basis.

The ICAV classifies all their investments as financial instruments at fair value through profit and loss.

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****1. Significant Accounting Policies (Continued)****b) Investments (continued)****i. Classification, Recognition and Derecognition (continued)**

The ICAV recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument, and all significant rights and access to the benefits from the assets, and the exposure to the risks inherent in those benefits, are transferred to the ICAV. The ICAV derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the ICAV.

**ii. Measurement**

Financial instruments are measured initially at fair value (transaction price) plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately, while on other financial instruments they are amortised.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income.

Financial assets and financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method, less impairment loss, if any.

Financial liabilities arising from the redeemable participating shares issued by a Fund are carried at the redemption amount, representing the Investors' right to a residual interest in that Fund's assets.

**iii. Fair Value Measurement Principles**

The fair value of financial instruments is based on their quoted market prices at the Statement of Financial Position date without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced at current mid prices. The ICAV uses the closing mid prices for the Sub-Funds.

If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

**iv. Impairment**

The ICAV recognises loss allowances for Expected Credit Loss ("ECLs") on financial assets measured at amortised cost.

The Fund measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Funds consider reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Fund's historical experience and informed credit assessment and including forward-looking information.

The Fund assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****1. Significant Accounting Policies (Continued)****b) Investments (continued)****iv. Impairment (continued)**

The Fund considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Fund in full, without recourse by the Fund to action such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

The Fund considers a financial asset and cash held to/from brokers to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of 'investment grade'.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the ICAVs are exposed to credit risk.

**Measurement of ECLs**

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Fund expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

**Presentation of allowance for ECLs in the statement of financial position**

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

**c) Cash and Cash Equivalents**

Cash comprises of current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

**d) Income and Expenses**

Dividends, gross of foreign withholding taxes, where applicable, are included as income when the security is declared to be ex-dividend. Bank interest income is accounted for on an effective interest rate. Interest income on fixed and floating rate securities is accounted for on an effective yield basis. Income received arising on fixed interest securities is recognised as a component of operating income. Further analysis of this operating income is shown in Note 3.

**e) Fees and Charges**

Investment management fees, administration fees, custody fees, sub-custody fees and other operating expenses are charged to the Statement of Comprehensive Income on an accruals basis.

**f) Valuation Point**

The valuation point used to value the securities for the purpose of the financial statements is that of 31 August 2020, the last business day of the financial year.

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****1. Significant Accounting Policies (Continued)****g) Investment Funds**

Investment funds which are traded in active markets are valued using quoted market prices at the Statement of Financial Position date. Investment Funds which are not publicly traded are normally valued at the underlying audited net asset value as advised by the managers or administrators of these Investment funds, unless the Investment Manager is aware of good reasons why such a valuation would not be the most appropriate indicator of fair value.

**h) Redeemable Participating Shares**

Redeemable Participating Shares are redeemable at the Shareholder's option and are classified as financial liabilities. Any distributions on these redeemable participating shares are recognised in the Statement of Comprehensive Income as finance costs.

**i) Gains and Losses on Investments**

Realised gains or losses on disposal of investments and financial derivative instruments during the year and unrealised gains and losses on valuation of investments and financial derivative instruments held at the year end are included in the net gains and losses on financial assets and liabilities at fair value through profit or loss within the Statement of Comprehensive Income.

**j) Taxation**

Dividend and interest income received by the ICAV may be subject to withholding tax imposed in the country of origin. Investment income is recorded gross of such taxes and the corresponding withholding tax is recognised as a tax expense.

**k) Securities Lending**

The ICAV has a securities lending agreement with The Northern Trust Company, London Branch who act as agent. The agent in turn has entered into a securities lending agreement with each borrower on terms that the borrower shall deliver to the Escrow agent, concurrently with or prior to the delivery of the loaned securities, collateral having a market value at the time of delivery at least such value as determined by the lender or, in the absence of such determination, at least equal to or in excess of 105% of the market value of the loaned Securities unless the borrowed securities and collateral are denominated in the same currency then a collateral level of 102% will apply. The ICAV uses J.P. Morgan Chase Bank, The Bank of New York Mellon and Euroclear Bank S.A. as Escrow agents.

During the year ended 31 August 2020, all Funds were engaged in this programme. The Security Lending Programme was suspended on 22 April 2020 and remained in suspension throughout the remainder of the financial year. Details of their lending are summarised in Note 13 to the financial statements.

The legal title and risks and rewards of the securities on loan remains with the Funds of the ICAV and therefore these securities form part of the financial assets at fair value through profit or loss on the Statement of Financial Position.

**l) Distributions**

As outlined in the "Background to the ICAV", KBI Emerging Markets Equity Fund, KBI Developed Equity Fund, KBI Global Equity Fund, KBI Eurozone Equity Fund, KBI North America Equity Fund, KBI ACWI Equity Fund, KBI Water Fund, KBI Integris Global Equity Fund and KBI Global Sustainable Infrastructure Fund may distribute. Where applicable, distributions are classified as Finance Costs in the Statement of Comprehensive Income. See Note 16 for details of distributions.

**m) Forward Foreign Currency Contracts**

Forward foreign currency transactions are valued based on the closing forward contract rates on the relevant foreign exchange market on a daily basis. Realised gains and losses and movements in unrealised gains and losses are included in the net gains and losses on financial assets and liabilities at fair value through profit or loss within the ICAV's Statement of Comprehensive Income.

## Notes to the Financial Statements (Continued)

## For the financial year ended 31 August 2020

## 1. Significant Accounting Policies (Continued)

## n) Foreign Exchange

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit and loss are recognised together with other changes in the fair value. Net currency gains/(losses) as set out in Note 4, are net foreign exchange gains and losses on monetary financial assets and financial liabilities other than those classified at fair value through profit or loss.

Assets and liabilities denominated in foreign currencies, other than the functional currency of the ICAV, have been translated at the rate of exchange ruling at 31 August 2020. Transactions in foreign currencies are translated into Euro at the exchange rate ruling at the date of the transaction. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the financial year.

The following EUR exchange rates were used to convert investments, assets and liabilities to the functional currency of the EUR denominated Sub-Funds of the ICAV:

Turkish Lira	7.3590	5.8263

**o) Transaction Costs**

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

**p) Use of Estimates and Judgements**

The preparation of financial statements in conformity with IFRS requires the ICAV to make use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates. The areas involving a higher degree of judgement or complexity or areas where estimates and assumptions are significant to the financial statements are disclosed in Note 2(b). The estimates and underlying assumptions are reviewed on an on-going basis.

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****2. Financial Risk Management****Strategy in using Financial Instruments**

The investment objectives of the Fund are summarised in the "Background to the Fund" on pages 2 and 3.

Day-to-day risk management is undertaken by the Investment Manager, as detailed in the sections below. The Administrator and Depositary report separately to the Directors on a quarterly basis.

The Funds are subject to a number of investment restrictions imposed by external regulators or self-imposed by the Prospectus, Memorandum and Articles of Association. These restrictions are intended to reduce the risks associated with the Funds financial instruments. The Investment Manager also reports monthly to the Designated Directors on whether the Funds have been operated in accordance with the investment guidelines as defined in the Prospectus as well as any self-imposed limitations.

In pursuing its investment objective, the ICAV is exposed to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk that could result in a reduction in the ICAV's net assets. The Investment Manager's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Funds' financial performance.

These policies for managing risk have been applied throughout the financial year.

**Market Risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: foreign currency risk, interest rate risk and market price risk.

The Investment Manager moderates market risk through a careful selection of securities and other financial instruments within specified limits. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments. The Funds' overall market positions are monitored on a daily basis by the ICAV's Investment Manager and are reviewed on a regular basis by the Board of Directors.

At 31 August 2020, the ICAV's market risk is affected by three main components:

- a) changes in actual market prices ("market price risk");
- b) foreign currency movements ("foreign currency risk"); and
- c) interest rate movements ("interest rate risk").

**a. Market Price Risk**

Market price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices.

The ICAV's equities, debt securities and Investment Funds are susceptible to market price risk arising from uncertainties about future prices of the instruments.

The Directors of the ICAV manage the market price risks inherent in the investment portfolio by ensuring full and timely access to relevant information from the Investment Manager. The Board meets regularly and at each meeting reviews investment performance and overall market positions. The Directors monitor the Investment Managers' compliance with the ICAV's objectives. There were no material changes to the ICAV's policies and processes for managing market risk and the methods and assumptions used to measure risk during the year. The Sub-Funds do not currently invest in derivative instruments and are not involved in netting or hedging arrangements with the exception of KBI Water Fund. The Sub-Funds of the ICAV are long-only equity funds. The global exposure is calculated daily by the Funds' administrator in the calculation of the net asset value. For Sub-Funds exposed to derivative instruments or netting or hedging activity, global exposure is calculated based on the Commitment Approach as outlined in the ICAV's Risk Management Procedure ('RMP') document.

Details of the nature of the Sub-Funds' investment portfolios at the Statement of Financial Position date are disclosed in the Schedule of Investments on pages 140 to 256.

## Notes to the Financial Statements (Continued)

Conversely, if equity and Investment fund prices had decreased by 25% at the Statement of Financial Position date, with all other variables held constant, this would have decreased net assets attributable to holders of redeemable participating shares of the Funds by an equal amount. Actual trading results could differ from the above sensitivity analysis and these differences may be material.

(NB: the above sensitivity analysis is based on the assumption that only equities and investment funds are exposed to market price risk).

## Notes to the Financial Statements (Continued)

## For the financial year ended 31 August 2020

## 2. Financial Risk Management (Continued)

## b. Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Certain of the Funds' assets, liabilities and income are denominated in currencies other than Euro with the exception of the KBI Water Fund and the KBI North America Equity Fund whose assets, liabilities and income are denominated in currencies other than US Dollars. They are, therefore, exposed to currency risk as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates. Income denominated in foreign currencies is converted to the functional currency of the Fund on recognition (accruals basis).

In accordance with ICAV policy, the Investment Manager monitors the Funds' currency position on a daily basis and the Board of Directors review it on a regular basis.

There were no material changes to the ICAV's policies and processes for managing currency risk and the methods used to measure risk during the financial year.

The tables below document the Funds' exposure to currency risks as at 31 August 2020 and 31 August 2019. All figures are stated in the base currency of the Fund (noted in parentheses).

## Notes to the Financial Statements (Continued)

## For the financial year ended 31 August 2020

## 2. Financial Risk Management (Continued)

## c. Interest Rate Risk

The Funds' interest bearing financial assets and financial liabilities expose them to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on their financial position and cash flows.

Interest rate risk is managed, in part, by the security selection process of the Investment Manager which includes predictions of future events and their impact on interest rates, diversification and duration. In accordance with ICAV policy, the Investment Manager monitors the Funds' overall interest sensitivity on a daily basis and the Board of Directors review it on a regular basis. There were no material changes to the ICAV's policies and processes for managing interest rate risk and the methods used to measure risk since the prior year end.

As at the Statement of Financial Position date, none of the Sub-Funds had any significant exposure to interest rate risk.

## Credit Risk

The ICAV takes on exposure to credit risk, which is the risk that a counterparty or an issuer will be unable to pay amounts in full when due.

The carrying amounts of financial assets best represent the maximum credit risk exposure at the Statement of Financial Position date. In accordance with ICAV policy, the Investment Manager monitors the Funds' overall credit risk on a daily basis and the Board of Directors review it on a regular basis. There were no material changes to the ICAV's policies and processes for managing credit risk and the methods used to measure risk since the prior year end.

As at the Statement of Financial Position date, the Funds' financial assets exposed to credit risk amounted to the following:

The amounts in the above tables are based on the carrying value of all accounts.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

Each Sub-Fund's Investment Manager analyses credit concentration based on the counterparty of the financial assets that the Fund holds. Details of counterparties, where applicable, are disclosed in the Schedules of Investments.

Northern Trust Fiduciary Services (Ireland) Limited ("NTFSIL") is the appointed Depositary of the Fund, responsible for the safe-keeping of assets. NTFSIL has appointed The Northern Trust Company ("TNTC") as its global sub-custodian. Both NTFSIL and TNTC are wholly owned subsidiaries of Northern Trust Corporation ("NTC"). As at year-end date 31 August 2020, NTC had a long term credit rating from Standard & Poor's of (A+).

TNTC (as global sub-custodian of NTFSIL) does not appoint external sub-custodians within the U.S., the U.K., Ireland and Canada. However, in all other markets, TNTC appoints local external sub-custodians.

NTFSIL, in the discharge of its depositary duties, verifies the Fund's ownership of Other Assets, (as defined under Other Assets, Art 22(5) of UCITS V Directive 2014/91/EU), by assessing whether the Fund holds the ownership based on information or documents provided by the Fund or where available, on external evidence.

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Fund, clearly identifiable as belonging to the Fund, and distinct and separately from the proprietary assets of TNTC, NTFSIL and NTC.

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****2. Financial Risk Management (Continued)****Credit Risk (Continued)**

In addition TNTC, as banker, holds cash of the Fund on deposit. Such cash is held on the Statement of Financial Position of TNTC. In the event of insolvency of TNTC, in accordance with standard banking practice, the Fund will rank as an unsecured creditor of TNTC in respect of any cash deposits.

Insolvency of NTFSIL and or one of its agents or affiliates may cause the Fund's rights with respect to its assets to be delayed.

The Board manages risk by monitoring the credit quality and financial position of the Depositary and such risk is further managed by the Depositary monitoring the credit quality and financial positions of sub-custodian appointments.

The ICAV has a securities lending agreement with The Northern Trust Company who act as agent. The agent in turn has entered into a securities lending agreement on behalf of the ICAV, with each borrower on terms that the borrower shall deliver to the Escrow agent, concurrently with or prior to the delivery of the loaned securities, collateral having a market value at the time of delivery of at least equal to or in excess of 102%, where the collateral currency equals the security currency or 105% of the market value of the loaned securities in all other cases. Note 13 contains details of the securities lending agreement.

The Sub-Funds invested in debt securities, which have an investment grade as rated by a well-known rating agency. For unrated assets a rating is assigned using an approach that is consistent with rating agencies.

**Liquidity Risk**

The main liability of the Funds is the redemption of any shares that investors wish to sell. The Funds' constitution provides for the daily creation and cancellation of shares and they are, therefore, exposed to the liquidity risk of meeting shareholder redemptions at any time.

The Funds' financial instruments include holdings in investment funds which may not be easily liquidated at an amount close to fair value in order to meet liquidity requirements, or to respond to specific events such as deterioration in the credit worthiness of any particular issuer. The Funds' listed securities are considered to be readily realisable as they are all listed on major worldwide stock exchanges.

The Funds may, from time to time, invest in derivative contracts traded over the counter, which are not traded in an organised market and may be illiquid. As a result, the Funds may not be able to liquidate quickly its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as deterioration in the creditworthiness of any particular issuer.

In accordance with ICAV policy, the Investment Manager monitors the Fund's liquidity position on a daily basis and the Board of Directors review it on a regular basis.

There were no material changes to the ICAV's policies and processes for managing liquidity risk and the methods used to measure risk since the prior year end.

The tables overleaf analyse the Sub-Funds' financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances as the impact of discounting is not significant. All amounts are stated in the base currency of the Funds.

## Fair Value of Financial Assets and Liabilities

Most of the Sub-Funds' financial instruments are carried at fair value on the Statement of Financial Position. Usually the fair value of the financial instruments can be reliably determined within a reasonable range of estimates. For certain other financial instruments, including amounts due from/to brokers, accounts payable and accrued expenses, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments. The carrying value of all of the Sub-Funds' financial assets and liabilities at the Statement of Financial Position date approximated their fair values.

## Fair Value Disclosure

IFRS 13 requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities in the Statement of Financial Position.

The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The fair value of financial assets and financial liabilities traded in an active market (such as traded securities) are based on latest available quoted mid-market prices for Sub-Funds priced at midday and at the closing mid prices for other Sub-Funds.

A financial instrument is regarded as quoted in an active market if the quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The fair value of financial assets and financial liabilities that are not traded in an active market is determined by using valuation techniques. The Funds use a variety of methods and make assumptions that are based on market conditions existing at the financial year end date.

## Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2020

## 2. Financial Risk Management (Continued)

## Fair Value Disclosure (Continued)

The Sub-Funds classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2); or
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The following is a summary of the fair valuations according to the inputs as at 31 August 2020 in valuing the Sub-Funds' assets and liabilities:

## 2. Financial Risk Management (Continued)

## Fair Value Disclosure (Continued)

The following is a summary of the fair valuations according to the inputs as at 31 August 2019 in valuing the Funds' assets and liabilities: (continued)

## KBI Global Sustainable Infrastructure Fund

	Quoted Prices in Active Markets Level 1 EUR	Significant Other Observable Inputs Level 2 EUR	Significant Unobservable Inputs Level 3 EUR	Total EUR
<b>Assets</b>				
Financial assets designated at fair value through profit or loss				
Equities	17,037,123	–	–	17,037,123
<b>Total assets</b>	<u>17,037,123</u>	<u>–</u>	<u>–</u>	<u>17,037,123</u>

Investments, whose values are based on quoted market prices in active markets and, therefore, classified within Level 1, include active listed equities. Level 2 includes investment funds. The ICAV does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2.

The Level 2 amounts above represent investment funds and forward exchange contracts.

There were no significant transfers between Level 1 and Level 2 during the financial year.

## Financial Assets and Liabilities not measured at Fair Value

The financial assets and liabilities not measured at fair value through profit or loss are short-term financial assets and financial liabilities whose carrying amounts approximate fair value. Cash and cash equivalents are categorised as Level 1 and all other financial assets and liabilities not measured at fair value through profit or loss are categorised as Level 2 in the fair value hierarchy.

During the financial year, an investment held by the KBI Energy Solutions Fund and KBI Global Resource Solutions Fund, Nemaska Lithium was written down and is currently classified as a Level 3 asset with NIL market value. As at 31 August 2020, the units amount to 1,271,628 held by KBI Energy Solutions Fund and 226,491 held by KBI Global Resource Solutions Fund.

No other investments have been classified within Level 3 at any time during the financial year ended 31 August 2020.

## 11. Share Capital

*Participating Shares*

The authorised share capital of the ICAV is 500,000,000,000 Shares of no par value and 300,000 redeemable non-participating shares of EUR 1 each. Non-participating shares do not entitle the holders thereof to any dividend and on a winding up entitle the holders thereof to receive the amount paid up thereon but do not otherwise entitle them to participate in the assets of the ICAV. The Directors have the power to allot shares up to the authorised share capital of the ICAV. There are 300,000 non-participating shares of EUR1 each currently in issue which are held by the Investment Manager and its nominees. The Investment Manager may redeem these Shares shortly after the ICAV is launched provided that the ICAV maintains a minimum capital amount of EUR 300,000 at all times.

*Variation of rights*

The rights attached to any class may be varied or abrogated with the consent in writing of the holders of three-fourths in number of the issued shares of that class, or with the sanction of a special resolution passed at a separate general meeting of the holders of the shares of the class, and may be so varied or abrogated either whilst the ICAV is a going concern or during or in contemplation of a winding-up.

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****11. Share Capital (Continued)***Voting rights*

On a show of hands at a general meeting or class meeting of the ICAV, every Shareholder holding shares who is present in person or by proxy shall have one vote and on a poll every Shareholder present in person or by proxy shall have one vote for every share of which he/she is the holder.

*Distribution on winding up*

Subject to the provisions of the ICAV Act, if the ICAV shall be wound up the liquidator shall apply the assets of each Sub-Fund in such manner and order as he thinks fit in satisfaction of creditors' claims relating to that Sub-Fund.

The assets available for distribution amongst the holders shall be applied as follows:

- i) Firstly, in the payment to the Shareholders of each Class or Fund of a sum in the Functional Currency (or in any other currency selected and at such rate of exchange as determined by the liquidator) as nearly as possible equal to the Net Asset Value of the Shares of the relevant Class or Fund held by such Shareholders respectively as at the date of commencement of winding up;
- ii) Secondly, in the payment to the holders of non-participating shares of sums up to the nominal amount paid up thereon out of the assets of the ICAV not comprised within any Fund provided that if there are insufficient assets to enable such payment in full to be made, no recourse shall be had to the assets comprised within any of the Funds;
- iii) Thirdly, in the payment to the Shareholders of each Class or Fund of any balance then remaining in the relevant Fund, in proportion to the number of Shares held in the relevant Class or Fund; and
- iv) Fourthly, any balance then remaining and not attributable to any Fund or Class shall be apportioned between the Funds and Classes pro-rata to the Net Asset Value of each Fund or attributable to each Class immediately prior to any distribution to Shareholders and the amounts so apportioned shall be paid to Shareholders pro-rata to the number of Shares in that Fund or Class held by them.

## Notes to the Financial Statements (Continued)

## For the financial year ended 31 August 2020

## 13. Securities Lending Income

Securities lending is the market practice whereby securities are temporarily transferred by one party (the lender) to another (the borrower) in return for collateral and income in the form of substitute payments over the course of the loan agreement. The Sub-Funds were engaged in securities lending activities during the financial year ended 31 August 2020. Securities used in securities lending activities were held at fair value and were recorded on the Global Securities System of Northern Trust Fiduciary Services (Ireland) Limited.

The income generated from securities lending is divided between the ICAV (60%), the securities lending agent, i.e. Northern Trust (30%) and the Investment Manager (10%).

The Security Lending Programme was suspended on 22 April 2020 and remained in suspension throughout the remainder of the financial year. Details of the income generated from securities lending and the value of securities on-loan at the year-end is as follows:

The following table shows the securities lending position of the ICAV at 31 August 2020:

	Year ended 31 August 2020 EUR	Year ended 31 August 2019 EUR
<b>KBI Energy Solutions Fund*</b>		
Income earned during the year		
ICAV	25,185	64,826
KBI Global Investors Limited	4,197	10,804
Northern Trust	12,592	32,414

	Year ended 31 August 2020 EUR	Year ended 31 August 2019 EUR
Value of securities on loan at year end	17,590	3,577,594
Value of collateral held in respect of these loans at year end	18,570	3,790,495

\*Securities were delisted in early 2020. The investment manager is working with the borrower to agree a close-out of the loans.

A security on loan from the KBI Energy Solutions Fund remained on-loan during the suspension of the securities lending programme due to its de-listing. At 31 August 2020 the lending agent had agreed sale terms with the two brokers involved and was finalising a return of value to the fund.

## 14. Fees

**Investment Management Fee**

Under the provisions of the discretionary investment management agreement, the ICAV will pay the Investment Manager a fee of up to 2.50% per annum of the Net Asset Value (plus VAT, if any) of the KBI North America Equity Fund, the KBI ACWI Equity Fund, the KBI Water Fund, the KBI Global Resource Solutions Fund, the KBI Emerging Markets Equity Fund, the KBI Global Equity Fund, the KBI Developed Equity Fund, the KBI Eurozone Equity Fund, the KBI 50/50 Global/Eurozone Equity Fund, the KBI Integris Global Equity Fund, the KBI Global Sustainable Infrastructure Fund and the KBI Diversified Growth Fund. Within these maximum permitted limits, the Investment Manager's fee may differ between Sub-Funds and between classes of the same Sub-Fund. This fee shall be accrued weekly on each dealing day and payable monthly in arrears.

The ICAV will pay the Investment Manager a fee of up to 1.5% per annum of the Net Asset Value of the KBI Energy Solutions Fund (plus VAT, if any) in respect of Sterling Class A, Euro Class A, Euro Class B, Euro Class C, Euro Class D and Euro Class F Shares and an annual fee of up to 2.5% per annum of the Net Asset Value of the this Fund (plus VAT, if any) in respect of US Dollar Class A, US Dollar Class B, US Dollar Class C, US Dollar Class D, Sterling Class B, Sterling Class C, Sterling Class D, Euro Class E, Euro Class G and Euro Class H.

Investment Management fees of EUR 7,492,884 (31 August 2019: EUR 8,395,477) were charged during the financial year, EUR 1,296,071 of which were outstanding at the financial year end (31 August 2019: EUR: 2,406,513).

**Administration Fee**

Under the provisions of the administration agreement, the ICAV shall pay to the Administrator out of the assets of each Sub-Fund attributable to each Class an annual fee which shall be accrued weekly on each Dealing Day and payable monthly in arrears, at a rate which will not exceed 0.035% of the Net Asset Value of KBI Water Fund, KBI Energy Solutions Fund, KBI Global Resource Solutions Fund, KBI Emerging Markets Equity Fund, KBI Global Equity Fund, KBI Developed Equity Fund, KBI 50/50 Global/Eurozone Equity Fund, KBI Eurozone Equity Fund and KBI North America Equity Fund (plus VAT, if any) and 0.10% of the Net Asset Value of KBI ACWI Equity Fund, KBI Integris Global Equity Fund, KBI Global Sustainable Infrastructure Fund and KBI Diversified Growth Fund (plus VAT, if any).

The Administrator shall also be entitled to be repaid out of the assets of the Sub-Fund all of its reasonable out-of-pocket expenses incurred on behalf of the Sub-Fund, which shall include legal fees, couriers' fees and telecommunication costs and expenses.

Administration fees of EUR 499,012 (31 August 2019: EUR 543,663) were charged during the financial year, EUR 292,644 of which were outstanding at the financial year end (31 August 2019: EUR 168,317).

**Depository Fee**

Under the provisions of the depository agreement, the ICAV shall pay to the Depository out of the assets of each Sub-Fund attributable to each Class an annual fee which shall be accrued weekly on each Dealing Day and payable monthly in arrears, at a rate which will not exceed 0.065% of the Net Asset Value of KBI Water Fund, KBI Energy Solutions Fund, KBI Global Equity Fund, KBI 50/50 Global/Eurozone Equity Fund, KBI Developed Equity Fund, KBI Eurozone Equity Fund, KBI Global Resource Solutions Fund, KBI North America Equity Fund, KBI ACWI Equity Fund, KBI Integris Global Equity Fund and KBI Global Sustainable Infrastructure Fund (plus VAT, if any), 0.075% of the Net Asset Value of KBI Emerging Markets Equity Fund (plus VAT, if any) and 0.10% of the Net Asset Value of KBI Diversified Growth Fund (plus VAT, if any).

The Depository shall also be entitled to be repaid out of the assets of each Sub-Fund all of its reasonable out-of-pocket expenses incurred on behalf of the Sub-Fund which shall include couriers' fees and telecommunication costs and other expenses incurred on behalf of the Sub-Fund by the Depository in the proper performance of its duties (plus VAT, if any).

Depository fees of EUR 1,102,896 (31 August 2019: EUR 1,208,325) were charged during the financial year, EUR 625,934 of which were outstanding at the financial year end (31 August 2019: EUR 350,207).

## Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2020

## 15. Efficient Portfolio Management

The Investment Manager may utilise derivatives and other techniques and instruments (including, but not limited to, options, swaps, futures and forwards) whether the intention of providing protection against risks of gaining exposure to certain markets, sectors or securities, or otherwise of increasing the return on the Assets of each Fund. Such derivatives and other techniques and instruments will only be used for efficient portfolio management purposes in accordance with the conditions and limits laid down by the Central Bank of Ireland. The Investment Manager may also, when facilities become available in the relevant markets, lend the Portfolio securities and/or purchase securities subject to repurchase agreements. Securities lending is dealt with separately in Note 13. No securities were purchased subject to repurchase agreements during the financial year.

Open derivative contracts held at the Statement of Financial Position date are disclosed in the Schedule of Investments beginning on page 140.

## 17. Related Party Transactions

IAS 24 "Related Party Transactions" requires the disclosure of information relating to material transactions with parties who are deemed to be related to the reporting entity.

**Investment Manager**

Related parties include the Investment Manager, KBI Global Investors Ltd. Amounts earned by the Investment Manager and due to the Investment Manager at financial year end, are disclosed in notes 5 and 10, respectively and also disclosed in note 14.

During the financial period, the Fund received assets in-specie and cash from another Unit Trust fund managed by the Investment Manager. The value of these in-specie and cash transactions was EUR 5,885,736.

**Directors**

The following Directors of KBI Funds ICAV are also employees of the Investment Manager, KBI Global Investors Limited:

Derval Murray, Padraig Sheehy, Gerard Solan and Patrick Cassells.

Frank Joseph Close and Fiona Mulcahy, as Independent Directors, each earn fees for the financial year ended 31 August 2020 and 31 August 2019 of EUR 20,000 per annum. All other directors are not entitled to a fee.

Effective from 1 January 2020, Fiona Mulcahy's fee increased to EUR 29,000 per annum and Frank Joseph Close's fee increased to EUR 24,000 per annum. The total fee earned for the financial year ended 31 August 2020 was EUR 26,000 and EUR 22,667 respectively

The table below shows a reconciliation of the Directors' and Secretary's interests in the Funds of the ICAV for the financial year ended 31 August 2020:

## 18. Auditor Remuneration

The remuneration for all work carried out by the statutory audit firm in respect of the financial year is as follows:

	<b>Year ended 31 August 2020</b>	<b>Year ended 31 August 2019</b>
	<b>EUR</b>	<b>EUR</b>
Statutory audit of the Company accounts*	61,425	65,700
	<u>61,425</u>	<u>65,700</u>

\*Exclusive of VAT.

## 19. Taxation

The ICAV is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act 1997, as amended (“TCA”).

The ICAV will not be liable for tax in respect of its income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution or any redemption or transfer of Shares.

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****19. Taxation (Continued)**

A chargeable event does not include:

- i) Any transactions in relation to Redeemable Participating Shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- ii) An exchange of Redeemable Participating Shares representing one Fund for another Fund of the ICAV; or
- iii) An exchange of Redeemable Participating Shares arising on a qualifying amalgamation or reconstruction of the ICAV with another Fund.

A chargeable event will not occur in respect of Redeemable Participating Shareholders who are neither resident nor ordinarily resident in Ireland and who have provided the ICAV with a relevant declaration to that effect. There were no chargeable events during the financial year.

In the absence of an appropriate declaration, the ICAV will be liable for Irish tax on the occurrence of a chargeable event and the ICAV reserves its right to withhold such taxes from payments to relevant shareholders.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its Shareholders. A chargeable event includes any distribution payment to shareholders or any encashment, redemption or transfer of shares or an ending of a Relevant Period.

**20. Soft Commission Arrangements**

There are no soft commission arrangements for the year ended 31 August 2020 (31 August 2019: Nil).

**21. Comparative Figures**

The comparative information is supplied for the Statement of Financial Position as at 31 August 2019. The comparative information supplied for the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and the Statement of Cash Flows is for the financial year from 1 September 2018 to 31 August 2019.

**22. Events During the Financial year**

**COVID-19**

The COVID-19 virus pandemic continues to impact countries and economies across the globe. The Directors are aware that global financial markets are still monitoring and reacting to the outbreak. All markets have incurred increased volatility and uncertainty since the onset of the virus.

The Directors have also noted the operational risks that are posed to the ICAV and its service providers due to global and local movement restrictions that have been enacted by various governments. The COVID-19 pandemic is an unprecedented event and the eventual impact on the global economy and markets will largely depend on the scale and duration of the outbreak.

The Directors will continue to monitor this situation.

There have been no other events during the financial year end, which, in the opinion of the Directors of the ICAV, may have had an impact on the financial statements for the financial year ended 31 August 2020.

## Notes to the Financial Statements (Continued)

## For the financial year ended 31 August 2020

## 23. Reconciliation of Net Asset Value in accordance with IFRS

At 31 August 2020, an adjustment was required to the financial statements. This was required in order to bring the financial statements in line with IFRS. This adjustment was for the purposes of the year-end financial statements only and did not affect the monthly reported dealing net asset value. The Net Asset Value of the Funds has been adjusted by the formation expenses written off and dealing after the NAV's cut off point, in accordance with IFRS. Note 12 shows the dealing NAV's per Share by Share Class prior to the adjustment described below. The following is the reconciliation detail as at 31 August 2020 and 31 August 2019:

	<b>KBI Energy Solutions Fund Year ended 31 August 2020 EUR</b>	<b>KBI Water Fund Year ended 31 August 2020 USD</b>	<b>KBI Emerging Markets Equity Fund Year ended 31 August 2020 EUR</b>	<b>KBI Developed Equity Fund Year ended 31 August 2020 EUR</b>	<b>KBI Global Resource Solutions Fund Year ended 31 August 2020 EUR</b>	<b>KBI Global Equity Fund Year ended 31 August 2020 EUR</b>	<b>KBI 50/50 Global/ Eurozone Equity Fund Year ended 31 August 2020 EUR</b>

**Notes to the Financial Statements (Continued)****For the financial year ended 31 August 2020****24. Post Balance Sheet Events**

The COVID-19 outbreak has caused extensive disruption to businesses and economic activities globally. The uncertainty and instability described in Note 22 continues post financial year-end.

The ICAV has agreed to recommence securities lending subject to agreement with the agent lender on its obligations concerning the Securities Financing Transactions Regulation (“SFTR”).

There have been no other events subsequent to the financial year end, which, in the opinion of the Directors of the ICAV, may have had an impact on the financial statements for the financial year ended 31 August 2020.

**25. Approval of Financial Statements**

The financial statements were approved by the Board on 9 December 2020.

**KBI Diversified Growth Fund****31 August 2020**

No Securities lending or collateral as at 31 August 2020.

**Appendix 2 - UCITS Remuneration Disclosures (Unaudited)****Remuneration**

The ICAV has adopted a remuneration policy as required by the UCITS Regulations and which follows the European Securities and Markets Authority ("ESMA") Guidelines on Sound Remuneration Policies in a way and to the extent that is appropriate to the ICAV's size, and internal organisation, and the nature, scope and complexity of its activities.

The ICAV's remuneration policy is designed to ensure that any relevant conflicts of interest can be managed appropriately at all times. The remuneration policy has been adopted by the Directors, who will review the policy annually and any revisions to the remuneration policy require their approval.

**Identified Staff**

The ICAV has determined that the following persons would fall within the categories of staff to which remuneration policy applies (Identified Staff):

- (i) Independent Non-Executive Directors.
- (ii) Designated Persons responsible for the monitoring of certain management functions of the ICAV.

	<b>Headcount</b>	<b>Total Fixed Remuneration EUR</b>	<b>Total Variable Remuneration EUR</b>	<b>Total Remuneration EUR</b>
Independent Non-Executive Directors	2	53,000	-	53,000
Designated Persons	3	-	-	-

The ICAV does not pay any variable remuneration to any of its Identified Staff.

**Investment Manager**

The ICAV has delegated portfolio management to the Investment Manager which is subject to an equivalent remuneration regime to that in the UCITS directive:

The Fixed, Variable and Total Remuneration given below represents the total remuneration of xx identified staff of the Investment Manager and is based on data which has been provided by the Investment Manager.

	<b>Total Fixed Remuneration EUR</b>	<b>Total Variable Remuneration EUR</b>	<b>Total Remuneration EUR</b>
Investment Manager	-	-	-
Designated Staff - 18 persons	418,756.85	118,993.75	537,750.60
